

Table of Contents

Research on Extraction Method of LOS rate of Rotating Bomb Full strap-down seeker Based on Kalman Filter Fang Hongsong, Liu Yongshan	1
Residual correction WLS based on Indoor Location Algorithm Considering Arrival Angle and Phase Difference Parameter Estimation Lu An, Li Hui, Gong Yingkun, Yang Li	6
A posteriori error estimates of adaptive discontinuous Galerkin methods for monotone quasi-linear elliptic problems Liming Guo, Qingmin Zhang	11
Owner Real-time Identification Scheme Based on Cycle Variation Law of Phone's Accelerometer Heng Yin	20
A Review of Graph-based Dependency Parsing NanFang Jian	25
Design and manufacture of PM2.5 measuring instrument Based on STC12C560S2 Hui Zhang, Yani Fan, Jian-hao Yuan	31
A Brief Introduction to the Control System of a Ship's Propulsion Device You Xiaoguang, Cao Zhaofei, Tao Fei	35
Review of PMSG YAN Yujia, ZHAO Jincheng	39
A method of mining the change of word semantic across different timescales Maoyuan Zhang, Shuyuan Sun, Yibo Wang	43
An Improved Algorithm for School Bullying Based on K-means Clustering Xinyi Gong	47
Analysis and Design of Medical Information Search System Lin Ye, Hui Cao, Xiang Zhang, Haojie Zhang	53
Application of modified artificial bee colony algorithm in health condition diagnosis YuKe Zhang	58
Electricity Pricing Mechanism of Industrial Users Based on Power Quality Ke Wang	62
Clustering Algorithms In Data Mining Xiaosong Chen	66
The Solution for Satisfaction of Maximal Boolean Polynomial Equations Based on Genetic Algorithm Shunyu Yang	71

A 1MHz-64MHz Active RC TI-LPF with Variable Gain for SDR Receiver in 65-nm CMOS	78
Chaoxuan Zhang, Xunping Hou, Tiejun Lu	
Design and Research of Intelligent Grain Depot	84
Chen Bo, Xue Xiaoqing, Liu Ting	
A Micro Force Measurement and Tracing System Based on Dead-Weight-Balanced Hinge	88
Zhiyi Wang, Meirong Zhao, Peiyuan Sun, Yaqian Han, Yelong Zheng	
Technical Analysis on Safety Video Control for Electric Power Operation Field	95
Wang Wenxian, Ma Weiqing, Tang Baoguo	
Data Acquisition and Analysis of Distribution Automation System	100
Yang Chengpeng, Zhang Xiaoliang, Ren Yong, Wang Ruijue, Liu Jie	
Application of Computer Feedback Technology Software in the Rehabilitation of Motor Function	106
Sheng Guo	
The Design and Application of System Software about Test Evaluation and Training of the Athlete's Movement Function	110
Guo Sheng	
Robot Path Planning Based on Genetic and Chaotic Optimization Algorithm	114
Gan Xusheng, Gao Wenming, Han Jun	
Chi-Square Discretization Algorithm of Continuous Attribute Based on Information Entropy	120
Wei Yanming, Gan Xusheng, Li Huaping	
Research on Texture based on the Method of Image Retrieval	126
Lei Ao	
Planning Risk Assessment of Extension Smart Grid Model based on Multi Layer Model	130
Xiaoyan LI, Chenxi WU, Dangye, Xuejing	
E-commerce System of Community based on J2EE	134
Hongqing Liu	
Design and Implementation of e-mail Client Application	138
Hongqing Liu	
Study on Robust Optimization Design Method Based on Random Probability Test	142
Hongqing Liu	
Design and Implementation of Computer Network Vulnerability Assessment System	145
Hongqing Liu	
Study on Soil Heat Imbalance of Ground Source Heat Pump based on Complex Network System	150
He Ren	

Vehicle Target Recognition Algorithm based on Multidimensional Feature Fusion and Adaboost-SVM Strong Classifier	
Shiqi WANG	158
Design of Video Surveillance System based on Power Line Carrier and RFID	
Xiaorui YUE, Jihua CHEN	162
A Survey on Incremental Learning	
Junwei Zhong, Zhenyan Liu, Yifei Zeng, Lijia Cui and Zizheng Ji	166
Lane-level Path Guiding Method for Unmanned Ground Vehicle	
Qiangrong Yang, Jianyao Hu, Meiling Wang, Huachao Yu and Qi Peng	175
Employee Recruitment Method Based on Random Forest	
Zhaoyong An, Haifu Shen and Xueting Wang	182
