Table of Contents

Research on the Strategy of Deepening the Innovation and Entrepreneurship of College Students by Network New Media **1**

Deying Liu and Ping Gao

Practical Exploration of Cultivating College Student's Innovation Ability: A Case study of School of Economics and Management of Jilin Institute of Chemical Technology **6**

Bing Song and Lishu Han

Face Recognition Technology based on Kalman Filter **11**

Lili Wang

Design and Research of Integrated Warehousing System Based on Cortex Processor **19**

Xiaohui Wang, Kewei Lei and Xiaoning Dou

Design and Implementation of a Computer-based Interactive Teaching Equipment **23**

Yonghui Ma, Zhi Kanmai and Ma Wenning

Industrial Design in the Era of Information Technology **30**

Yang Liu and Xufeng Cheng

A Survey of College English Teachers' Ability to Manage English Teaching with Information Tools **36**

Guorong Shen

Research on Personalized Hybrid Recommendation Algorithm Based on Deep Learning **43**

Weiwei Guo and Feng Liu

The Impact of Artificial Intelligence in the Big Data Era on the Development of Commercial Banks **49**

Liduo Zhang and Lina Zhang

The Application of Internet Thinking in Vocal Music Teaching in Normal Colleges **55**

Yu Xiang

The Thought of Teaching Reform on Statistics Curriculum in Management Specialty **60**

Bin Cui, Yi Tian and Jun Ke

The Impact and Countermeasures of Internet Finance on the Traditional Business of Commercial Banks in China **63**

Zhenxing Ge and Ying Hu

Research on Quality Evaluation Model of Green Marketing Management of Grid Corporations Facing "Internet +" **67**

Qian Wang, Jia Li, Xiaolong Yang, Jingdong Wang

A Feature Extraction and Description Method of Fruit Image Based on Computer Vision **72**

Chunhua Qian, Hequn Qiang and Yi Ren

Design of Computer Bar Code Detector Based on Single Chip Microcomputer **76**

Rui Liang

Anti Falling System for Elderly People Based on Single Chip Microcomputer **80**

Yifan Xiao, Hongtao Yu, Yue Liang, Yan Zhang and Yan Bao

The Research and Implementation of Integrated Application for Excel 2010 If Function **85**

Shaoyun Song

Research on Innovation of Classroom Teaching of Insurance under the Background of Internet Finance **91**

Xinzhu Zhou

Comprehensive Management Promotes the Quality Improvement of Graduation Design for Computer Majors **96**

Jingfeng He

Research on Oilfield Network Information Security Protection System **100**

Jingshu Wang, Xin Wang and Xiaolong Wang

Research on Implementing the System of Budget Performance Management **105**

Huijie Zhu, Chunbo Wei and Guotao Xu

Study on B2B Cross-border E-commerce Website Design based on User Experience Element **110**

Ping Song and Xiaozhu Wang

Exploring the Optimization of Logistics Distribution Mode of Supply Chain Management under the Background of New Retail **117**

Li Liu and Shu Cai

The Constructing of Supervision System on Korean Autonomous Learning under the Internet Environment **120**

Zhenhua He

Decomposing Complete 3-uniform Hypergraph $K_{58}^{(3)}$ into 7-cycles with Computer Aid **123**

Narisu, Meiling Guan and Jirimutu

Research on Cooperative Innovative Talents Training Mechanism of Economic and Management Specialty in Private Colleges from the Perspective of Symbiosis Theory **130**

Lijuan Zhang and Zhenjie Liao

Research on the Applications of Big Data in Modern Football **136**

Zhehan Yang

Research on the Teaching Mode of Tennis Course in Colleges and Universities Based on "Internet +" **140**

Jiajia Li

Research on the Construction of Higher Vocational Smart Campus under the Background of Big Data **144**

Guo Hao

Design of Employment Tracking System for Public Administration Graduates **148**

Xiaohui Wang, Geng Li and Xiaolong Sun

Research on the Smart Tips of Ultrasound Range Touching Based on Single Chip Microcontroller **151**

Wenling Liu, Wenqian Qiang, Ruoxi Ma and Xiangcai Zhu

Test Process Model and Management in Software Engineering **156**

Hongyu Li, Jinsheng Zhang and Donghu Gu

Research on Algorithm of Personalized Recommendation System Based on Deep Learning **162**

Feng Liu and Weiwei Guo

Model Analysis of Risk Supervision and Coordination Development of Internet Finance **168**

Wuchao Zhao and Qing Tan

Design and Implementation of Python Learning Platform **174**

Sixia Lian, Shangyu Sun, Zerui He, Jiali Xu and Qian Yin

The Application of Random Forest in Individual Credit Risk Management **179**

Yuqing Gu

Research on Three-type Talents Training Model of Internet of Things Specialty under the Background of New Engineering **184**

Zhenduo Wang, Qian Bian and Xiaofan Chen

Research on the Influence of Government Accounting System Reform on University Financial Management **188**

Guotao Xu, Chunbo Wei and Huijie Zhu

Study on the New Teaching Mode of Physical Dance in Colleges and Universities Based on "Internet Plus" **193**

Wei Yang

Intrusion Detection Method Based on Deep Learning **197**

Mingyuan Xin, Yong Wang and lin Fan

Researches on the Teaching of Office Software Based on "Internet+" **201**

Chunyan Zhang

Research on Supply Chain Optimization of Cross-border E-commerce **205**

Ting Lu

Problems and Countermeasures in the Construction of Scientific Research Management Information in Universities **209**

Wei Wei

Teaching Reform of Management Accounting Course of ACCA Experimental Class **214**

Yuming Li and Shuixia Tao

Research and Discussions on the Method of Video Tracking on In-depth Learning **218**

Xiaomin Gao

Research on the Application of Management Accounting in University Financial Management **223**

Chunbo Wei, Guotao Xu and Huijie Zhu

Analysis on the Application of Computer Virtual Reality Technology Environment Design **228**

Lixia Hou

Protection Device of Control Switch Sensor Base on Intelligent MCU **233**

Zhiguo Meng and Lingxin Shi

Research on the Training System of Software Technology Professionals Based on Computational Thinking **237**

Feng Liu, Weiwei Guo, Yu Sun and Lanbo Liu

Summary of Research on Face Detection and Tracking Technology **242**

Xiaodan Lu

Research on Problem-driven Hybrid Learning Model Based on Computational Thinking **247**

Weiwei Guo, Feng Liu and Xiaomin Zhao

Overview of Distributed Computing Technology **252**

Haikui Wang

Monocular Image Depth Calculation Based on Convolution Neural Network **256**

Shi Zhibo
