

Table of Contents

Research on the Optimization of Smart Logistics Supply Chain Based on the Internet of Things	1
<i>Lifeng Li</i>	
Analysis of Industrial Product Modeling Design under Virtual Reality Technology	4
<i>Yan LIU, Yingying Jiang</i>	
Application and Reliability Improvement of Computer Communication and Network Remote Control Technology	8
<i>Shu CAI</i>	
Computer Information Processing Technology and Strategy in the Era of Big Data	12
<i>Jianguan Xin</i>	
Research on the Development of Computer Science and Technology Based on the “Internet Plus”	16
<i>Yuan YU</i>	
Design of Intelligent Recognition English Translation Model Based on Phrase Translation Combination	20
<i>Tingting Li</i>	
Research on Information Visualization Design Method Based on Emotional Concept in Cultural Heritage Protection	26
<i>Xu ZHANG</i>	
Research on Intelligent Trend and Mode of Fashion Design Based on Interactive Mode	32
<i>Bingqing Yi</i>	
Research on Chinese Children's Dance Creation and Arrangement Based on the Theory of Multiple Intelligences	37
<i>Xinyi Peng</i>	
The Application of Big Data Analysis Technology in English Translation	46
<i>Yuan Chang-pu</i>	
Analysis of the Opening Mode of Shandong Provincial Local Government Data Platforms Based on Open Data	52
<i>Haohan Wu</i>	
Construction of Competency Model of Student Managers Based on Big Data	58

<i>Wenfeng Liu, Xiang Ning</i>	
The Model Construction of Student Party Member Education and Management System Based on Data Warehouse	63
<i>Wenfeng Liu, Xiang Ning</i>	
Discussion on Quality and Safety Control of Housing Construction Project Management Based on Bim	69
<i>Shuai Liu, Jundan Wang</i>	
Research on the Security System of Digital Archives Information	74
<i>Yan Peng</i>	
Improvement of Gm (1,1) Model Based on Particle Swarm Optimization Algorithm--Model Performance Analysis Based on Epu Data	78
<i>Jiwei Liu</i>	
Clustering Analysis and Countermeasures of the Peak Carbon Dioxide Emissions Trend in Cities in Northeast China	83
<i>Yunyan Peng, Hui Dong, Yongbo Sun</i>	
The Application of Piotroski's f-Score in Selecting the Company's Stock Market	91
<i>Tanzesi He, Bing Tan</i>	
Tourism Big Data and Its Application	98
<i>Meiwei Tang, Xue Ren</i>	
Application of Vr Technology in Vocational Collegespractice Teaching	103
<i>Gewei Zhao</i>	
Application of Augmented Reality Technology in Daily Ceramics--Take Jingdezhen freehand blue-and-white as an example	109
<i>Xiong Ying</i>	
Research on the Optimization Path of the Operation Mechanism of the Old City Reconstruction in Shanghai Based on Building Information Model	116
<i>Yuhe Xie</i>	
Research on System Dynamics Model and Computer Simulation of Smart City System	125
<i>Qian Cheng, Xiaolong Li</i>	
Innovative Research on Higher Education Management Model in the Big Data Era	132
<i>Meng Chen, Chuntao Li</i>	

Choice of Distribution Mode of Medical Logistics Based on Anylogic Multi-Distribution Center	139
<i>TAO Ran, XU Xin-yi</i>	
Application Status and Development Trend of High-Rise Escape Devices	143
<i>Xiaopeng Zhou</i>	
On the Integration of Computer Application Technology and Information Management	148
<i>Meiqing Yang</i>	
This Paper Discusses the Design and Implementation of Transmission Line on-Line Monitoring System	152
<i>Chunli Hu</i>	
Dual-Channel CNN-BiGRU Sentiment Analysis Method Based on Part of Speech	156
<i>Xin XU</i>	
Research on Software-Defined Network Security Technology Based on Cloud Data Center	163
<i>Fengyi Chen</i>	
Using Computer Data Analysis Technology to Calculate International Crude Oil Price Fluctuations	168
<i>Yan WU</i>	
Location Planning Method of Urban Railway Logistics Park Based on Fuzzy Recognition	173
<i>Shurun Xie</i>	
Research on Automatic Inspection of Product Production Based on Computer Vision	178
<i>Yangjia Zhou</i>	
Project Management Model of Internet of Things Application System Based on Association Rule Mining Algorithm	186
<i>Yajuan Zhang, Ru JING, Haifeng LU, Jiajing CAI</i>
