

Table of Contents

Multi mobile robot positioning technology and path planning design based on WiFi Positioning	1
<i>Xiangyun Cai, Jiaqi Tan, Zhirong Lu</i>	
Research status and prospect of human-computer interaction of connected vehicles based on intelligent network	6
<i>Jiaqi Tan, Xiangyun Cai</i>	
Implementation of arbitrary binary timer based on medium scale integrated circuit	11
<i>Changping Gao</i>	
Research on Mobile Robot Navigation Algorithm based on Ant Colony Optimization Neural Network	16
<i>Yahui Huang</i>	
Research on Web Access Information Safety Mining Method in Distributed Environment	21
<i>Yafang Li</i>	
Research on innovative application of energy-saving and environmental protection technology in building construction under the background of low carbon	26
<i>Donghui Liang</i>	
Research and Analysis of User Experience of Shopping Websites by Intelligent Design System	31
<i>Risheng Liang</i>	
Research on Computer Network Security under Big Digital Background	38
<i>Junfang Liu</i>	
Application of 3D scanning measurement and BIM technology in the construction of large special-shaped buildings	42
<i>Zhigang Lv</i>	
Analysis and thinking on energy saving design strategy of HVAC system in civil buildings	47
<i>Haitao Sang, Yingxia Huo</i>	

Calculation of bridge seismic dynamic reliability based on seismic vulnerability	52
<i>Wenyu Xu, Yanqun Zhou</i>	
Research on vehicle monitoring system and data communication reliability based on Internet of Things technology	58
<i>Yuxin Li, Huishan Yu</i>	
Study on preparation of polythene antibacterial and mildew proof packaging material and its technology for fruit and vegetable preservation	63
<i>Junling Zhang, Yangyuan Zhi</i>	
Research on charging safety and braking stability of pure electric vehicle regenerative braking	68
<i>Zheng Xijiang, Wang Ligong, Lv Yuanfeng</i>	
Numerical Simulation and Optimization of Coal-fired Boiler System based on Dynamic Grid Technology	74
<i>Xiaoyan Zhang</i>	
Analysis of Residual Smoke Consumption of Cigarette Units based on Big Data	79
<i>Gao Xiao</i>	
Antibacterial Coating on the Surface of Implantable Materials	84
<i>Lishuang Xiao</i>	
A green, eco-friendly and self-supporting geopolymer membrane for Cr (VI) removal from aqueous solution	94
<i>Qing Tang, Chuchu Wang, Changsheng Peng, Shoulian Wei, Peng Hu, Tafeng Tseng, Lianfen Chen</i>	
High Speed Railway Bolt Detection Based on Deep Learning	99
<i>Xiangyi Qin</i>	
Study on Seismic Performance of Prefabricated Concrete Structure building	105
<i>Zhang Zhongliang</i>
