

Table of Contents

Design of animation multi view scene reconstruction model based on virtual reality	1
<i>Zhao Zhao</i>	
Analysis of Tourism Marketing Platform Based on Social Network Perspective	10
<i>Yang Fang</i>	
Efficiency Evaluation for Ship-borne UHF Communication Equipment Based on AHP	17
<i>Guo Yi, Su Zhijin, Niu Hai</i>	
Data Analysis Method of Innovation and Entrepreneurship Education based on Big Data	22
<i>Lu Bai, Li Zhu, Yan Li, Siyu Wu, Xuan Yu</i>	
Design of E-commerce Supply Chain Traceability System Based on Blockchain Technology	29
<i>Yan Li, Lu Bai, Li Zhu, Yanping Li</i>	
Access Control of Social Network based on Blockchain Technology	35
<i>Liu Jianlan, Zhu Li, Xiong Guang, Li Yan, Xu Zhengze</i>	
Research on inventory management method of meteorological spare parts	42
<i>Jing Chen, Xiao Han</i>	
An analysis method combining cryptographic analysis and image analysis	47
<i>Zhonglin Yang, Yanhua Cao, Shuguang Wu, Haibin Li, Hang Chen</i>	
Comparative analysis of image encryption models based on chaos	55
<i>Zhonglin Yang, Yanhua Cao, Qinyu Zhu, Mengyang Wang, Shanghai Zhou, Hang Chen</i>	
Calculation of a new type of column stabilized floating platform's anchor chain force	61
<i>Sun Miao, Li Weibo, Gong Zheng, Tian Jierong</i>	
Research on Logistics Avoidance Strategy of Campus Unmanned Distribution Based on Markov Decision Process	66
<i>Fumin Mi, Bingqi Wang, Caiyi Wang</i>	
Comparison of Different Classifiers for Diabetes Diagnosis	72
<i>Shuchang Ye, Enqi Liu</i>	
Research status and prospect of human-computer interaction of connected vehicles based on intelligent network	85
<i>Jiaqi Tan, Xiangyun Cai</i>	
Application of GPS-based Dynamic Survey Technology in Civil Engineering	90
<i>Zhigang Lv</i>	

Research on the Application of Artificial Intelligence Technology in Engineering Cost	96
<i>Zhou Jiaying, Wang Huining</i>	
Non Linear Relation: the Design of Deriving Physical Equations and Distributing Them with 3D Modeling	100
<i>Guoxian Wang</i>	
Development and Insights from the USSF Satellite Equipment for Space Objective Surveillance	108
<i>Sishi Dai, Li Jiang, Yinan Hu, Heng Wu</i>
