

Table of Contents

Research on the Application and Collaborative Mechanism of Distributed Simulation Technology in Cross - Regional Police Joint Tactical Drills	1
<i>Cui Jianjun</i>	
Optimization of Gradient Vanishing Problem in Deep Neural Networks Based on Attention Mechanism	6
<i>Wu Nannan</i>	
A Study on the Value-Added Evaluation of Digital Competence of University Teachers Based on AHP and Regression Models in the Context of Digital Education	11
<i>Yiwen Cao, Lin Zhang, Jinghao Yang, Zihao Sun, Wenhao Wang, Jianjun Liu</i>	
Genetic Algorithm-Based Crop Planning Optimization: A Modeling Study on Price Sensitivity and Crop Rotation Constraints	20
<i>Shiqi Cui, Yaqiang Sui, Yan Wang</i>	
Feasibility Analysis Study of Organic Agro-Ecosystems Based on Logistic Growth Models	30
<i>Zhudi He, Qiaodao Jiang, Zihan Wang</i>	
Research on Enterprise Production Decision-Making Based on Simulated Annealing Algorithm	38
<i>Zi'an Lin</i>	
Optimizing the Shanghai Second-Hand Housing Price Prediction with CNN Model	47
<i>Xiaoyang Li</i>	
Construction and Early Warning Research of Water Quality Pollution Grading Prediction Model Driven by Multi-Source Data	56
<i>Zhangxin Huang, Liangfan Lin</i>	
Enhancing Task Performance Through Human-AI Collaboration: Examining the Moderating Effects of Performance Expectancy and Task Structure on Generative AI Effectiveness	65
<i>Jiayang Sun, Qingya Liu, Yihan Li</i>	
Sunspot Prediction Model Based on BiLSTM Network	71
<i>Shubin Zhang</i>	
Strategies for Enhancing the Mechanical Properties of Hydrogels in Bone Tissue Engineering	78
<i>Wencao Wang</i>	

KDM5 Family as a Therapeutic Target in Breast Cancer: Mechanisms and Clinical Potential	86
<i>Kefan Hu</i>	
Study on Application Strategies for Surface Modification to Optimize Biocompatibility of Medical Magnesium Alloy Implants	93
<i>Yanbo Tong</i>	
Motor Imagery Recognition Based on Spiking Neural Networks	100
<i>Dawei Yan</i>	
Research on the Historical Interaction Trends of European Literature and Music Based on a Multimodal Large Language Model	106
<i>Ziyu Li</i>	
Mathematical Modeling of Short-Term and Long-Term Economic Impacts of U.S. Semiconductor Reshoring Policies: A Multi-Model Analysis of Supply Chain Dynamics and Strategic Benefits	112
<i>Jianing Zhang</i>	
AlphaFold-Driven Structural Optimization of COX-2 Inhibitors: Enhancing Safety and Selectivity for Feline and Canine Veterinary Therapeutics	122
<i>Yining Zhang</i>	
AI-Enhanced Mobile Breast Cancer Screening: Bridging Rural-Urban Disparities in Gynecological Healthcare Access	131
<i>Chenjue Yu</i>	
Mathematical Modelling of Long-Wave for Interfacial Waves in Two-Layer Fluids Based on the Dirichlet-Neumann Operator	140
<i>Hanxi Wei</i>	
Cross-Disciplinary Analysis of Soil Nutrient Dynamics under Non-Priority Ancient Trees in Shijingshan Moshikou, Beijing: Connecting Urban Ecology to Public Health and Nutrition	148
<i>Boqin Li</i>	
A Spatial Feature Attention Enhanced Facial Action Unit Detection Model for Analyzing the Effects of First Language on Facial Muscle Movements	167
<i>Mohan Yu</i>	
InstaGuard: An Intelligent Skating Protection System	174
<i>Xiangyi Li</i>	
Martial Arts Pose Estimation via Combined Convolutional and Graph Neural Networks	181
<i>Jiawen Zhang</i>	

Research Progress and Prospects of Hydrogen Production via Water Electrolysis	188
<i>Hao Liu</i>	
A Survey on the Applications of Reinforcement Learning in Computer Vision and Natural Language Processing Introduction	198
<i>Runxi Kang</i>	
Autonomous Driving Environmental Perception and Decision-Making Technology Roadmap Comparison	215
<i>Zhiyuan Wen</i>	
Study on the Application Strategy of Microbial Community Structure Optimization in Industrial Wastewater Treatment	228
<i>Ziyi Li</i>	
"Research Progress and Application Prospects of Iron-Based Hydrogen Evolution Catalysts"	235
<i>Hao Liu</i>	
Preparation of Conductive Polymer Based Composite Materials and Their Electrophysiological Response in Myocardial Tissue Repair	247
<i>Zhanhao Hu</i>	
Research on Optimization Application Strategies of Phase Change Materials in Lithium Battery Thermal Management Systems	256
<i>Xiaozhu Wu</i>	
Adaptive Acoustic Resonator System for Cross-Cultural Performance Spaces: Multi-Device Optimization for Bridging Eastern and Western Musical Traditions	264
<i>Shanwei Lin</i>	
Research on the Basic Combination of Elementary Number Theory and Encryption Algorithm	285
<i>Yejun Wu, Hongli Yang</i>	
Research on Adaptive Control and Precision Optimization Technology of Industrial Robot for Intelligent Manufacturing	291
<i>Wenjie Chen</i>	
Research on University Students' Organizational Activities Optimization and Decision Support System Based on Big Data	296
<i>Meng Xie</i>	
Statistical Modeling and Application Exploration of Unstructured Data Based on Deep Learning	302
<i>Fei Yin</i>	

Research on Key Technologies of Data Perception and Intelligent Scheduling for Smart Cities Empowered by Artificial Intelligence	308
<i>Xiaoxuan Zhang</i>	
Ecological System Construction Path of Intelligent Organization Construction Integrating Artificial Intelligence Technology	314
<i>Huafeng Zhang, Li Chen, Bin Zhu, Shaobo Liu, Yixuan Chen</i>	
Modeling of Member Behavior Data and Evaluation System of Organizational Capability in the Smart Organization Construction Platform	319
<i>Wenrui Zhang, Li Chen, Bin Zhu, Shaobo Liu, Juntai Shi</i>	
Research and Application of Intelligent Recommendation System Algorithms Based on Deep Reinforcement Learning	325
<i>Shang Ma</i>	
Advances in corrosion protection and integrity of Produced water reinjection wells tubing in oil and gas field	331
<i>Yun Ma, Ruize Niu, Wei Tian, Yacong Yang, Li Li</i>	
Study on Control Strategy of Impurity Elements and Influence of Mechanical Properties during Hot Working of Regenerated Titanium Alloy TC4	346
<i>He Xiaoying, Yan Fang, Fu Wei</i>	
Application and Research of Computer Network Multicast Algorithm Based on GA	352
<i>Yafang Li</i>	
The Design of Upper Computer Integration Software in Radar Working Status On-Line Monitoring System	358
<i>Cun Xie, Peiwen Ye, Yuhui Wang, Mian Tang</i>
