Keywords: Social organization, Community governance, Party building

Abstract: Community governance is the most basic level of national governance. Innovating community governance system is an important part of promoting the modernization of national governance. It is the current and future trend of our society to promote the refinement of community governance. Community-level Party building leads social governance, and is a major innovation in the concept, system and mode of social governance that meets the development requirements of the new era. At present, social organizations intervene in community governance by providing services to the community and flexible governance from an advantageous perspective. Zhonglou District of Changzhou has explored the path of party building of social organizations from the aspects of ideological understanding, working methods, management system, guarantee mechanism, talent team, and party building model, which has reference significance for promoting party building and leading social organizations to participate in grassroots governance.

1. Introduction

As an important part of party building in the new era, social organization party building is the link between political parties and social organizations, as well as the bridge to integrate the country and the society.[1]The focus of social governance is at the grass-roots level, and the difficulties are also at the grass-roots level. Community-level governance guided by Party building is the main line and direction of China's social governance in the new era.To strengthen the party building of social organizations, ensure the correct development direction of social organizations, and guide social organizations to actively integrate into the community governance system under the leadership of Party organizations to help improve the standard level of community governance is the embodiment of the governance value of “people-centered” in the new stage of development. Grassroots governance is not just simply maintaining social order and response to the needs of the people's livelihood, but to put the party's basic line, important conference spirit, the guidelines and policies and national development strategy and implement to let people know, understand and support at the grass-roots level, is to adhere to the leadership of the party and ruling for the people, the people's supreme concept into the whole process of grassroots governance full cycle complete.

2. Requirements and Objectives of Party Building Innovation of Social Organizations under the Background of Refined Community Governance

Urban and rural communities are the basic units of social governance and the living homes of urban and rural residents. Epidemic prevention and control, elevator installation, community renovation, garbage classification, environment beautification, home-based care, contradiction mediation, parking space negotiation, space design, residents mobilization, corridor renovation, pet raising and other “small matters” in the community are all “big events” that are related to building a social governance pattern of joint construction, governance and sharing. To deepen and improve the governance of urban residential areas, we need to deepen the precision of urban governance and the precision of services. We need to promote the extension of urban and rural community development governance to the periphery of urban governance, and we need to make urban governance more refined and precise, as well as professional and social services. Therefore, the party building of

social organizations is the bridge and link to strengthen the connection between the Party and social organizations, and the party organization of social organizations is also the external interface of integrating multi-community resources to carry out the party building community construction. The party construction of social organizations can lead social organizations to assist in the mediation of community conflicts, and play a professional role in the mediation of property disputes, family disputes, neighborhood disputes and the resolution of letters and visits.

3. Bell Tower Practice and Experience of Social Organization Party Building Innovation under the Background of Refined Community Governance

3.1 Build the “Spark Party construction pilot Station” with the party construction work Law of “12345” to consolidate the red position of party construction of social organizations in Zhonglou District

The party construction of social organizations is an important measure to cover the party organizations and work in the new social organizations, to guide the political development direction of social organizations in the form of political embedding, to enhance the resource acquisition ability of social organizations and to strengthen the internal management ability of social organizations.[2] To solve the problem of institutional construction of the party construction of social organization, standardization management of the “short board”, break the “fundamental” problems of the party construction of social organizations, namely, to establish party organizations, party branch work development and the party members' work hard, in recent years, the clock tower district civil affairs bureau by ramming party positions, activate the party building engines, explore new models of “party building and public welfare” to “three take the lead in exploring” formed “one over, double hatching, trilogy, four, five” “12345” social organization with the characteristic of the clock tower party construction new method. We will make breakthroughs in the five aspects of party building philosophy, thinking, method, mechanism and content of social organizations. The city took the lead in building the party building position of social organizations -- “Spark Party building Pilot Station”, and promoted the institutionalized, standardized and specialized development of the party building work of social organizations in the whole region; In social organization party building concept, idea, method, mechanism, content and so on five aspects breakthrough, joint party branch was the first to establish a social organization, to establish “social organization with the party go, strive to achieve new era” of the ideological guidance, the origin and development, and combing the social organization built exhibition hall, the development of social organizations, excitation source various social organizations of public welfare and public value highly identity; We will take the lead in establishing a group of think tanks for social work experts, and select a group of university experts, community secretaries, social workers and other social work talents to serve as party building instructors for district social organizations.

3.1 Innovate the Thinking of “Party Building +” of Social Organizations and Build a “Flat” Social Mobilization System with the “Synergy of Four Forces”

In practice, the new type of social organizations carry out party building mainly by means of administrative promotion. Party committees, organizational departments, civil affairs departments and even competent business departments at all levels, with the help of political and administrative power, play a leading role in promoting the establishment of organizations[3]. To ensure the CPC's vitality and strength, primary-level Party organizations should exercise political leadership, ideological guidance, mass organization and social appeal. Zhonglou District social organization “Spark Party Construction pilot Station” insists on strengthening the foundation and promoting the construction of “four forces”, promoting the mutual promotion and progress of social organization party construction work and business development simultaneously. If an organization wants to obtain more resources, it needs to deal with the exchange of resources with external organizations, such as service objects, governments, partners, etc.[4] In recent years, the clock tower area social organization “xinghuo” party building pilot station with “party building and public welfare”, “party + project”, “party building and business”, “party + endowment”, “party + service”, “party +

innovation”, “party construction and supervision”, and communities in building to improve the management mechanism, the incubation platform, strengthen personnel training, cultivating advanced typical, make party think-tank, innovation community governance as the core of the working mechanism of “six integration”. Bell tower area social organization “xinghuo” party building pilot station to encourage district social organizations through the “circle of party building” acquaintances “circle” interest margin circle, side of industry circle, structures, interweave the social network, the construction of diversified social forces to widely participate in community governance, voluntary service and mass mobilization system response and makes the watchman holds the community “friends”. Such as bell tower area social organizations to tianfu volunteer service center to “party building leads, voluntary, mutual help and consultation work” as the service concept, relying on volunteers management system “the time bank”, build the community party building alliance linking regional resources, continue to promote “volunteer team construction, the construction of community platform, home health system construction, construction of community work” four big goals, organize community residents to carry out “neighborhood guardian, medical assistance, pair keep fusion, work development” and other kinds of help community neighborhood harmony of public welfare activities and community talent training plan, improve community residents self management, self education, self service and self supervise ability of autonomy.

3.2 Strengthen the Vitality of Party Building in Social Organizations with the “Five Teams”, and Stimulate the “New Driving Force” of Refined Community Governance

The working ability of party workers in social organizations affects the quality and efficiency of party building work. Strengthening the construction of party workers in social organizations is not only an urgent matter of the moment, but also a great plan for long-term development. Zhonglou District Social Organization Party Construction Guidance Center insists on taking social organization Party construction work as a “red line” throughout the training of social workers, and innovates the carrier of social organization Party construction in the form of themed Party day, public welfare venture, special education, business promotion, work exchange, outside visits, Party member salons, financial training and other forms. Through strengthening hatch social organizations, party organizations, hatch, secretary of the party organization, social work “four hatching” function of party members, with “strong party spirit training, community service is strong, strong cohesion, strong demonstration effect, strong business” as the goal to build a bell tower area social organization contingent of party branch secretaries of party members, social organizations, social worker, social organization party liaison team backbone team of social workers, social organization, social group party think-tank team, such as “five teams”. In the process of social organization party construction practice, the social organization is good at the advantage into play and professional service into the party construction practice, the grass-roots party construction in practice to obtain the successful experience of typical demonstration effect, such as excellent party member) integrated into the organizational culture construction, explore the social organization of professional service advantages and mechanism of the party's cutting edge exemplary role for the organic combination[5].At present, a number of vanguard members of social organizations, party branch secretaries and backbone social workers have emerged, such as Wu CAI, “Yi Xiu Ge” and Cha Wenying, “Pathfinder” for community construction. Encourages social organizations at the same time the party members' entrepreneurship “sail” action, the clock tower area center, service development, social organizations, lotus pond street Westwood street east, the block party member venture base, adai village social organization service base was named area party member pioneers such as base, “a bag of travel”, “the dilemma of wing childhood - the same year child development support plan” and other excellent demonstration project for changzhou municipal party committee organization department.” Party construction + public welfare + business” helps social organizations in Zhonglou District to become the main force of embedded community governance. At present, more than 1,100 social organizations in Changzhou Zhonglou District have gradually grown into “think tanks” for the propaganda of party and government policies, “adhesive” for

promoting social harmony, and pacesitators for serving grassroots people and participating in social governance innovation.

Third, under the new development concept of social organization party construction innovation countermeasures and thinking

The essence of party building in social organizations is to expand the influence and appeal of the Party in social organizations and grass-roots masses through the extension of party organization network and its effective operation. 2021 is an important historical moment for the 100th anniversary of the Founding of the Communist Party of China (CPC) and the first year of the 14th Five-Year Plan. The main theme of the fifth Plenary Session of the 19th CPC Central Committee to be held in October 2020 will be the formulation of the 14th Five-Year Plan for National economic and social development and the long-term goals for 2035, drawing a blueprint for China's development in the next five or 15 years. Facing the development of a global outbreak of a new era of profound changes, as well as the prevention and control under the background of normalized community governance is a new phenomenon, new requirements, new problems, and social organization party construction work should adhere to the “innovation, coordination, green, open, sharing” new development concept as the guidance, crack development problem, development advantages, strengthen the integration of community resources, mobilize the community artist, cultivate backbone, link network, innovation communities project, in the realization of governance and social adjustment, play a role of link in the process of benign interaction between residents autonomy. In order to further stimulate the vigor of fine social organizations to participate in community governance and endogenous power, clock tower area social service development center will be organized around “explore at community gear upgrades in establishing and perfecting community resource integration mechanism” as the theme of the experimental area construction goal, innovative break traditional service content (public welfare charity, service life, style action classes, conflict mediation class) to differentiate the practice of social organization type, Around the community party building combined constructing, grassroots autonomous dynamic excitation, community cadre training class scene, community governance, community resources links of supply and demand, and community development priority support, democratic consultation to promote community issues within the jurisdiction of a new architecture types such as professional social organization system, makes every effort to solve the community resource fragmentation, single form of party construction, various main problems such as insufficient participation, resource integration mechanism is not sound, provides good safeguard for sustainable development of community governance. Zhonglou District social organization “Spark Party Construction pilot Station” will consolidate the party's political construction as the core, with the goal of improving business capacity, promote the district social organization to realize the community governance role transformation from “service provider” to “model builder, support and guidance party, resource link party”. Boost social organization the “smart” wisdom “in modern science and technology means,” to make good use of “government purchase of public services,” the best “integration regions the ground resource, human,” with “advocacy group and condense the new medium of the masses, is responsible for the implementation of the organization of social commonweal project to take root” blossom “, promote the formation of the community consultative democracy and autonomy work and community civilization degree of ascension.
