Abstract: At present, our country is in the decisive period of building a socialist modern power and building a well-off society in an all-round way. In this period, the state also puts forward new requirements for the political and ideological education carried out in colleges and universities. The ideological and political education in colleges and universities is an important way for students to form correct political thought. Colleges and universities should strengthen the construction of ideological and political team and carry out teaching activities around the idea of "creating people by virtue ". This paper discusses how to integrate the thought of political education into ideological and political teaching under the background of creating people by virtue.

1. Introduction

It is very important to do well the ideological and political work of colleges and universities in the new period. The request of the report of the 18th National Congress of the Communist Party of China on the fundamental task of "creating people by virtue" and the ideological and political education emphasized by General Secretary Xi Jinping should carry out the fundamental task of creating people by virtue of virtue, and deepen the position and value of the concept of "establishing people by virtue by virtue" in education. With the continuous promotion of ideological and political education reform, the idea of creating people by virtue is summed up as the educational task of the new era, which contains profound connotation and practical value. At present, various colleges and universities have integrated the idea of moral education into the ideological and political education, but there are still some problems, we should find the right way to carry out the ideological and political education work in colleges and universities.

2. An overview of the Idea of Creating People by Virtue

The idea of creating people by virtue is the fundamental task of education put forward by the 18th National Congress of the Communist Party of China. The idea of creating people by virtue originated from the ancient times of our country, and it is some requirements for moral education, which reflects the importance people attach to moral education and the understanding of the essence of education in ancient times. The state integrates the idea of moral cultivation into the task of education, the purpose of which is to cultivate talents with good social morality and morality. To integrate it into the education of students and cultivate the builders and successors of socialism with Chinese characteristics[1].

3. The Importance of Ideological and Political Education

3.1. Building a Harmonious Society

Building a harmonious society is the goal of the Party and the goal of the state in carrying out ideological and political education. Through correct ideological and political education, improving
people's ideological and moral literacy, scientific and cultural literacy, promoting the formation of a good social atmosphere, and building a good interpersonal relationship, this is the basis for building a harmonious society, through people's continuous practice, the correct ideology and morality will be continuously disseminated to promote social harmony and stability.

3.2. Promoting Comprehensive Development

Carrying out ideological and political education correctly can promote the all-round development of human beings, including the ideological, moral and political aspects of human beings. If the development of each quality is not balanced, it may lead to the imperfect and sound development of human body and mind. The harmony of human beings can guarantee the harmony of society. As an element of society, people's ideological and moral character should also be cultivated and promoted to realize the unity of theory and practice, thus promoting the harmony and stability of society and contributing to the construction of a harmonious socialist society[2].

4. Problems Existing in the Ideological and Political Education of College Students

4.1. Problems of College Students

Current college students, there are some lack of social responsibility, political belief confusion and ideals and beliefs are not clear enough, lack of team awareness, psychological problems emerge in endlessly, the specific performance of the following. First of all, the political thought is not mature enough, the ideological attitude of some college students is not correct enough, the understanding of Marxism-Leninism, Mao Zedong thought and Deng Xiaoping theory is limited to the name, the profound connotation of it is not clearly understood, the influence of a large number of western trends of thought, and the political thought is not firm enough. Secondly, the values of some college students generally tend to be utilitarian, manifested in the study, work and other aspects, such as the students who want to join the party in the university is very many, but ask them the reasons for joining the party, some students are to evaluate excellence, some students for the convenience of future work, and so on. Finally, the rapid development of the network has some negative effects on students, although the popularity of the network will continue to broaden the students'horizons, but some students because of the lack of will, blinded by the various false information in the network, for example, many college students indulged in the game world, such as figure 1, addicted to entertainment gossip, lost interest in learning, resulting in the abandonment of good time, which is very bad for students' mental health.

4.2. Issues in the Development of Ideological and Political Education

The ideological and political education curriculum will also encounter some problems, first of all, there are many contradictions in the ideological and political education work of college students, which are reflected in the students and teachers, students and society, students and students, students have long been used to teachers as lecturers of the curriculum, teachers on the stage to talk about, students in the following small movements, indifferent, as shown in figure 2, the two sides
lack of interactivity, each of their own tasks. There is no communication between students, some students do not remember the names of the same class for a semester, the relationship between students become indifferent and estranged. Secondly, the theory of ideological and political education is lack of effectiveness and pertinence, there is no deep research on some modern theories, the problems of college students' concern and current political hot spots are not answered in time and accurately, and some viewpoints only force the theory into the theory, and the persuasion is insufficient, which makes the students' understanding of some principle problems is not clear enough. Finally, in the course of ideological and political education, the teaching method has not adapted to the interdisciplinary development, cannot be close to the actual life of college students, still adopt the form of preaching, ignoring the importance of inspiration, students often cannot combine theory with practice[3].

5. Measures to Carry Out Ideological and Political Education Under the Background of Creating People by Virtue

5.1. Improving the Education System

Based on the idea of creating people by virtue, colleges and universities should pay attention to the perfection of education system when carrying out ideological and political education. First of all, the school should establish a solid political literacy and professional ethics of ideological and political teachers, the party's fundamental tasks to carry out, so that the teaching plan to better carry out. After setting up an excellent education team, we should pay attention to the perfection of ideological and political education system, ensure the quality of education and the efficiency of education work, establish a set of ideological and political training system, strengthen the teachers' understanding and understanding of the idea of creating people by virtue, enhance the teaching ability of teachers, let teachers participate in systematic study and training, carry out targeted study, strengthen the ideological and political study of ideological and political teachers, unify their political ideas with the political ideas under the new period, improve the political literacy of teachers, and ensure that political ideological education can be carried out better[4].

5.2. Education Concept

In order to establish the educational concept of creating people by virtue, colleges and universities should pay attention to holding some special activities with the theme of cultivating people in the campus, combining with the rich campus culture, using propaganda means to promote the recognition of the idea of creating people by virtue. The school can organize the teachers to carry on the curriculum research on the idea of Li de Shuren, promote the pertinence and enforceability of the idea of Li de Shuren, and also ensure the more effective integration of the idea of Li de Shuren in the course of ideological and political education in colleges and universities. It is also necessary to deepen the concept of Li de Shuren, to organize a special discussion to discuss the achievements of Li de Shuren's theory, and to deepen the idea with truth.
5.3. Expansion of Education

In order to make ideological and political education more dynamic and innovative, it cannot be confined to the single teaching mode in the past, it is far from enough to carry out ideological and political education for students in ideological and political courses, so it should be integrated into all courses. It can strengthen the ideological and political education in combination with the current courses, so that students cannot only be educated by the idea of creating people in the classroom, but also be influenced by the way of campus culture and campus broadcasting in their life.[5].

5.4. The Concept of Deepening All-Round Development

In carrying out the ideological and political education curriculum under the idea of creating people, it is also preparing for the all-round development of students, which is the ultimate goal of educating people. While cultivating college students' professional knowledge and skills, we should also strengthen the education of students' culture, thought and politics to avoid the occurrence of high IQ crimes. Therefore, colleges and universities should also pay attention to the implementation of students' quality education in order to prevent students from having moral deviation or political and ideological deviation. Let the talents cultivated in colleges and universities have a sense of social responsibility, professional knowledge and skills, but also have a higher ideological and moral sentiment.

5.5. Purification of Campus Environment

Colleges and universities should create a campus environment for students, which is helpful to the formation of students' correct three views. For the current social and network environment we cannot purify, but we can block it with the pure campus environment. First of all, we should purify the bad entertainment environment around the campus, control the problem of college students' night home, establish a safe campus network system, and strengthen the monitoring of the use of the student network. The campus can promote the excellent traditional culture, expand the positive influence of ideological and political education, and purify the campus environment by using the idea of creating people by virtue and combining with the campus cultural activities.[6]

6. Conclusion

To sum up, students are the hope of national development, integrate the idea of establishing people by virtue into ideological and political education, strengthen the construction of teachers, promote the all-round development of students, promote the practice and application of ideological and political education, and cultivate talents with knowledge, morality and belief.
