Keywords: Independent College; college students; Party Building

Abstract: with the issuance of regulations on the education and management of Party members of the Communist Party of China, colleges and institutions pay more and more attention to the promotion of Party building, and independent colleges are no exception. As an independent college is a private college, its party construction is also faced with formalism, Party members do not play a leading role, Party organizations do not pay attention to ideological education, and the party spirit of Party members is not strictly examined. Based on the practical significance and function of the party construction of independent college students, this paper discusses the problems and Strategies of the party construction of independent college students in the Internet era.

1. Introduction

Since the new era, our country has paid more and more attention to the construction of Party members. The issuance of the regulations on the education and management of Party members of the Communist Party of China has pushed the construction of the party to a new height. As a private institution of higher learning, the complexity and difficulty of the party construction work of the independent college has increased. For independent colleges and universities, their party construction work has achieved good results after years of development, not only the number of Party members has grown steadily, but also the party's propaganda and ideological construction capacity in Independent Colleges and universities has been greatly improved. However, on the other hand, the party construction work facing students in Independent Colleges and universities also faces great challenges and problems, such as the formalization of the party construction work of students, the lack of firm belief in the party, the neglect of the requirements for the quality of Party members, and the new requirements of the Internet for Party members. Therefore, to explore the work of Party Construction in Independent Colleges and universities is a more concerned topic for Party construction workers and Party members in Independent Colleges and universities.

2. The contents of the party construction of the students in the Independent College

The party construction work in Independent Colleges and universities is mainly based on the party's basic line and guiding program, combined with the actual situation of independent colleges and universities, and under the condition of using the resources in the school, effectively carry out the work in the ideological construction, party organization construction, work style construction and other aspects of student party members, party activists, etc.

2.1 Ideological construction of College Students' Party

Ideological construction is an important work of Party construction and an important guarantee to ensure the party's executive power and ideological cohesion. Therefore, Party building workers in independent colleges must put ideological construction in the first place, ensure the purity and advancement of Party members and cadres, and keep pace with the times. The ideological construction of Party members and cadres should be based on Xi Jinping's new socialist ideology with Chinese characteristics and promote the healthy development of party conduct, style of study and work style on the basis of socialist core values. Ideological construction is an important magic weapon to prevent the infiltration of external forces and the foundation to ensure the party's

propaganda and spiritual leadership, so it is of great significance.

2.2 Developing the work of college student party members

The party organizations of independent colleges and universities also have the responsibility of absorbing, developing and cultivating excellent college student party members. The replacement of Party members and cadres is the source of the long-term vitality of the Communist Party of China, the power of the generation of advanced ideas, and one of the important and regular work of Party organization construction. The development of Party members of college students requires the party organizations of independent colleges to screen the ideological quality and learning ability of students, and to conduct the ideological education and assessment of these outstanding activists. The development of College Students' Party members is also an important guarantee for the self-improvement of the party organization in independent colleges. The party building work needs to be jointly promoted by enough party members. Therefore, independent colleges and universities basically have a proportion requirement for the number of Party members, especially the number of students' Party members in graduation grade, which is generally about 10%.

2.3 The management of college student party members

The management of Party members is the basis for ensuring party members' discipline and is also the basis for the party to guarantee its advanced nature. Under the background of the revision of the regulations of the Communist Party of China on the education and management of Party members, the management of Party members is becoming more strict, and the work difficulty of independent colleges and universities in the management of Party members and cadres is also increasing correspondingly. How to improve the quality and efficiency of the management of Party members and cadres and avoid formalism in the management of Party members and cadres is becoming a major focus in the management of Party members and cadres of college students.

2.4 The construction of the style of Party members of College Students

The construction of the party's style has the function of shaping the party's positive image and improving the party's influence. Some party members who play a leading role can not only provide the efficiency of the party's organization work, but also enhance the competitiveness of their units, so that students can trust the party more. However, if the party conduct is not correct, it may damage the image of the party and reduce students' willingness to join the party. Therefore, the construction of party conduct is also one of the important work of the construction of Party organizations in Independent Colleges and universities.

3. The significance of Party Construction in Independent Colleges in the Internet Age

3.1 To ensure the fairness of independent college education

In the Internet age, the phenomenon of education capitalization is becoming more and more prominent. The unfair and unequal educational resources are becoming an occasional situation between independent colleges and ordinary colleges. On this basis, the party organization construction of independent colleges and universities ensures that independent colleges and universities must bear the corresponding social responsibility, and that independent colleges and universities should not adjust the prices of living resources and learning resources around the campus at will, so as to ensure the fairness of independent colleges and universities in material terms. In the direction of development, as the president of independent colleges and universities is also a party member, they also need to accept the leadership of the party and the government, which also ensures that independent colleges and universities will not deviate from the needs of the party and the country in the direction of development.

3.2 Conducive to the cultivation of talents

In the Internet age, talent training is no longer limited to traditional universities, but most of the online courses in the Internet age are still produced by universities. In this context, the party construction work ensures that independent colleges and universities will not involve politics when

making online teaching resources, thus ensuring the purity of teaching materials and teaching resources. For personnel training, the purity of thought is an important guarantee. The construction of Party organization ensures that the teaching of independent colleges will not be affected by the society, and protects the environment for students' learning and growth.

3.3 Conducive to the leadership of the party

It is beneficial for the leadership of the party to carry out the party building work in Independent Colleges and universities. This is because the leaders of most independent colleges and universities are party members and cadres. The party has a greater advantage in coordinating school resources and surrounding social management resources. The connection between the school party organization and other departments or institutions can be communicated through the party organization, which makes the policies of the party and the state implemented in various fields and units, thus ensuring the leadership of the party.

3.4 Conducive to the development of private colleges and Universities

Independent colleges and universities belong to private colleges and universities. Their establishment or initiation needs the approval of the education department, and the relevant construction needs the supervision of the government department. These communication work relies on the communication between the party organizations. Therefore, the construction of independent colleges and universities needs the help of the party organizations at the beginning. After the independent college is completed, the party organization of the college will absorb excellent teachers and students into the party organization, and regularly study the party's ideological research results and policy requirements, so as to promote the development of the independent college in various work. Among them, education reform is also carried out at the request of the party and the state. Therefore, the construction of Party organizations in Independent Colleges and universities is conducive to the development of private colleges and universities.

4. Problems in the work of Party Construction of students in Independent Colleges

4.1 Part of the work of Party construction is just a formality

Formalism is a major obstacle in the party construction work, which makes many excellent students reduce their trust in the party organization at the beginning of joining the party. The specific formalism is that the writing of the application for joining the party is strictly required to be beautiful, the requirements for the activists of joining the party are quite different from the requirements for the party members and cadres, and there are more complex requirements for examination and approval and record when the party construction is promoted. The popular form of Party construction is also reflected in the ideological construction. When carrying out the ideological construction seminar, the requirements for participation in the meeting are higher than the requirements for substantive suggestions. In the process of promoting the ideological construction curriculum in the class, it is often ended in a short time due to lack of supervision. It can be seen that formalism is becoming the most important obstacle and stumbling block in the party construction work, which needs the attention of Party construction workers and Party members in Independent Colleges and universities.

4.2 Some party members failed to take the lead

Exemplary leading role is the best performance of Party members' advanced nature, but in independent colleges, some party members and cadres do not play a leading role. Some teachers of Party members don't pay attention to the ideological education of students, and require students to take photos as class meeting records, and then directly announce the end of class; some students of Party members have good academic achievements, but the relationship with class members is not harmonious; some party members recommend people related to their own interests to join the party due to their own interests, etc. These behaviors are the important performance that party members and cadres fail to play a leading role, which need independent colleges and universities to pay

attention to.

4.3 Lack of Internet behavior education for Party members

As an advanced member of the school, Party members and cadres need to be responsible for their own words and deeds. However, the Internet behavior of Party members and cadres has not been supervised. For example, Xiamen University's "clean and good" incident is an important manifestation of poor supervision of Party members and cadres' Internet behavior and inadequate ideological education of Party members. First of all, Party members should love the party's patriotism and guarantee the advanced nature of their thinking. Every word and act represents the image of the party organization in the outside world. Therefore, Party members need to be responsible for their own words and deeds, but unfortunately, due to the lack of Internet behavior education and ideological education for Party members, some party members publicize the spirit and tradition of other countries in the open Internet social occasions, which can only be said to be the major lack of Party Construction.

4.4 Lax examination of motives for joining the party

In the Internet age, students' needs become very rich, and students' motives for joining the party become difficult to identify. In order to join the party for scholarship, there are more and more cases of quitting the party at graduation, and the phenomenon of not paying or not paying party dues is also common. These are the results of lax examination on the motivation of the activists to join the party. The lax audit of joining the party will increase the difficulty of the government in dealing with corruption within the party, which will threaten the advanced nature of the party, making formalism and bureaucracy more and more in the work of Party building.

5. The Countermeasures of the party construction of the students in the Independent College

5.1 Establishing the feedback mechanism of formalism

The basic party organization is plagued by formalism. To break this situation, it can only be achieved through the construction of feedback mechanism. In the process of the independent college's party construction, it is necessary to establish a perfect anonymous feedback mechanism. Party members, cadres and activists can feed back their ideas of formalism to the Discipline Inspection Commission of the college or higher relevant departments in the form of anonymity, so as to promote the party organizations in Colleges and Universities to better understand the specific manifestations of formalism in the process of Party construction. The system of feedback mechanism should be constructed by higher Party organizations to ensure the protection of anonymous information and whistleblowers.

5.2 Establish incentive mechanism for excellent party members

For excellent party members, they should be commended for their outstanding deeds and given more opportunities for promotion and promotion. Under the incentive mechanism of excellent party members, it is necessary to record the evaluation that the party organization plays a leading role as a model in the personal files of Party members, so as to serve as one of the bases for the promotion of outstanding Party members in the later period. Under the incentive mechanism, the school party organization should give certain material and spiritual rewards to individual party members, mainly in the form of spiritual rewards, to encourage more party members to actively participate in party affairs and actively work, so as to make more party members volunteer to take the lead.

5.3 Strengthen ideological education of Party members

In the Internet age, the probability of material and spiritual temptation that party members and cadres may suffer increases. How to ensure the purity of Party members and cadres' thoughts depends on the ideological education work of Party organizations. The ideological education work of independent colleges and universities should work hard in two aspects. In terms of the students, we should break the traditional formalism education, strictly control the quality of ideological

education, and let the students carry out more practical activities of patriotism, socialist core values and other related thoughts. For Party members and cadres, they should be required to regularly report and communicate in any form, understand their views on various hot issues and cultural differences at home and abroad, and find and treat the radical ideas early, so as to improve the correctness of their expressions on the Internet.

5.4 Strengthen the normal assessment of party spirit of Party members

The assessment of the party spirit of Party members is usually difficult to quantify, but whether Party members and cadres are loyal to the party and the people can be seen from their words and deeds. The normalization assessment of Party members and cadres should be carried out in combination with the analysis of hot events, especially those involving foreign affairs and the interests of the people, which can best show the party spirit of Party members. The normal assessment of party spirit requires party members and cadres to express their views on hot issues, so that Party organizations can evaluate the real psychological status of Party members and cadres, so as to better ideological construction and education of Party members.
