**Keywords:** Epidemic prevention and control; college student; patriotiism education

**Abstract:** In the context of epidemic prevention and control, patriotic education for young college students should be integrated into epidemic prevention and control materials, and the cases and spirit of epidemic prevention and control should be integrated into patriotic education to make patriotic education more vivid; We should integrate the achievements of epidemic prevention and control, guide young college students to understand that patriotism and love for the Communist Party of China and the socialist system with Chinese characteristics are a unified whole, and make patriotism education more convincing; In combination with the comparison of epidemic prevention and control at home and abroad, guide young college students to be more firm and confident, and make patriotism education more attractive and effective; We should grasp the network platform for ideological guidance, pay attention to the artistry of education, and improve the dissemination and influence of patriotism education.

## 1. Introduction

College students are the future of the nation and the hope of the country. They shoulder the historical responsibility of realizing the modernization of the motherland and the great rejuvenation of the Chinese nation. Patriotism is the strength and foundation of the Chinese people to unite their efforts and make progress. In the special period of epidemic prevention and control, patriotism has been endowed with rich connotation of the times. To carry out patriotism education for college students under the situation of epidemic prevention and control, we should integrate the typical examples in the war of epidemic prevention and control into the process of patriotism education, educate college students to embody patriotism in practical actions, maintain political determination, adhere to practical work and prosper the country, integrate the realization of individual dreams into national and national dreams, and work together, Bravely shoulder the important task of national rejuvenation, release youth dreams and contribute youth strength; in the new era of China's opening a new journey of building a modern socialist country in an all-round way, implementing the strategy of strengthening the country and realizing the great national rejuvenation, educate students to be firm believers and faithful practitioners of socialism with Chinese characteristics, and enable college students to shoulder the responsibilities and responsibilities of Chinese youth.

## 2. The value of patriotism education for college students during the anti epidemic period

Patriotism, as the core of the national spirit, has been encouraging and encouraging the Chinese people to unite and struggle for thousands of years, which has a great centripetal force for the Chinese nation. Carrying out patriotism education among college students during the anti epidemic period will help guide the majority of young people to achieve good results in the relay race to build a modern socialist power and realize the great rejuvenation of the Chinese nation.

### 2.1 Help young people strengthen their political concept of patriotism and love for the party

"Difficulties and hardships make you successful". After the founding of the people's Republic of China, our party has united and led the people of the whole country, united as one, overcome difficulties and constantly get out of difficulties. The national anti epidemic in 2020 shows the

superiority of the socialist system with Chinese characteristics. In the face of this sudden epidemic, our party, relying on the superiority of the socialist system, once again led the people of the whole country to achieve major strategic achievements in the fight against epidemic diseases, so as to provide the most powerful guarantee for the health and safety of the broad masses of the people.

## 2.2 Help young people enhance the cohesion of national unity

National cohesion is the spiritual driving force for the country to promote social progress. Patriotism unites all nationalities with its great magnetic force. Patriotism with the sense of national responsibility and social responsibility as the core has become the spiritual pillar of sharing weal and woe between the people and the country. At present, we are experiencing a war without gunsmoke. "The epidemic is the devil, and we can't let the devil hide". This is an epidemic prevention and control interdiction war participated by the whole people. A general course has been given to all young students: only when they realize that the turbulent situation has brought all kinds of panic and losses to the people will they realize that the destiny of the country is closely related to their own future and cannot be separated; Only when the country is peaceful and stable, sovereign and independent, and all ethnic groups are closely united, can individuals have the opportunity and platform to display their talents; Only by holding all ethnic groups together like a fist with ten fingers can we have confidence and confidence to resist all kinds of difficulties.

## 2.3 Help young people improve their sense of mission for the country

"A strong youth makes a strong country". Contemporary young college students are the hope of the motherland and the future of the nation. Contemporary young college students must shoulder the mission and responsibility entrusted by the times. In the special period when the whole country is wholeheartedly fighting the epidemic, as "Building Morality and cultivating people"

# 3. Measures and strategies to improve the pertinence and timeliness of patriotism education for young college students under the situation of epidemic prevention and control

## 3.1 Let young college students consciously interpret in firm faith

The Era Connotation of patriotism young college students are facing a complex and changeable international and domestic situation, especially in the situation of global epidemic prevention and control, the world situation is intensifying, the geopolitical game is becoming more and more prominent, and the ideological struggle is sharp and complex. In this situation, the patriotism education of young college students should highlight the characteristics of the times, let them unify patriotism with love for the Communist Party of China and socialism, always improve ideological vigilance, establish "Four Consciousness", enhance "four self-confidence", and resolutely achieve "two maintenance", Consciously precipitate faith and belief into the quality of patriotism of today's young college students.

Table 1 Four Consciousness and four confidence

Four Consciousness	Political consciousness, overall situation consciousness, core consciousness and alignment consciousness
Four Confidence	Road self-confidence, theoretical self-confidence, institutional self-confidence and cultural self-confidence

Patriotism education must make great efforts to guide college students to know, love and serve the country. Based on understanding the motherland and learning patriotism knowledge and relevant theories, and focusing on stimulating college students' patriotism emotion, we should strive to cultivate young college students' ambition to devote themselves to the modernization of the motherland and their positive action of studying hard. Only by knowing the country can they love their country, "knowing the depth" can they "love all". Knowing the country should help them understand the past, the present and the future of the motherland through various effective ways, so as to encourage them to cherish the glorious history of the Chinese nation, cultivate their patriotic

spirit and improve their patriotic consciousness.

Help college students understand the motherland. Such as national education in combination with class meeting; Use radio and propaganda windows to introduce the glorious history of the motherland and the great construction achievements since the reform and opening up; Guide college students to carry out social investigation to make them feel the rapid development of the motherland; Combined with classroom teaching, we should talk about history, the outstanding contributions of patriotic national heroes and scientists, and the great achievements of the older generation of proletarian revolutionaries, so that young college students can truly feel the rapid development of socialist construction and the hard won achievements, so as to establish a great ideal and struggle spirit.

Guide college students to improve their understanding. For example, through the comparison between the old and the new society, college students can recognize the fact that the working people turn over to be the masters of the family; Through the comparison between socialism and capitalism, college students can understand the advantages of socialism and the historical fact that only socialism led by the Communist Party of China can save and develop China. Through comparison, college students are encouraged to unite patriotism with love for the Communist Party of China and socialism.

Patriotism is mainly reflected in the ambition to serve the country, talents to serve the country and trips to serve the country. Efforts should be made to cultivate ambition, talents and guidance. While helping college students understand the magnificent rivers and mountains of the motherland, long history, splendid culture and the great contribution of the Chinese nation to the human world, they should stimulate college students' national self-esteem, self-confidence and pride, and encourage them to study hard The spirit of working hard.

We should educate young college students to study hard and realize the "Chinese dream" of the great rejuvenation of the Chinese nation In combination, we should guide young college students to base themselves on the new era, combine patriotism with social reality, correctly understand the relationship between personal destiny and the destiny of their family and country, consciously assume social responsibility and the mission of the times, make more contributions to the fight against the epidemic, and be ready to give full play to their light and heat where the motherland needs most. Cultivate the ability of young college students to build the motherland. Serving the country is empty talk if one has the ambition to serve the country but no talents to serve the country. As the builders of the future cause of the motherland, young college students need to deeply understand that scientific and technological innovation and pioneering spirit are the driving force for the prosperity of the country. They should constantly strengthen scientific and cultural learning and bravely climb the peak of scientific research, Continuously improve the ability of patriotism, respond to the challenges of the times with excellent professional skills and take on the mission of the times.

We should guide young college students to dedicate their talents to the motherland. We should guide college students to participate in "contributing to the country" within their ability Their practical activities make them care about others, love the collective and share the same fate with the motherland. Encourage them to carry out their patriotic promises through social practice, social investigation, social public welfare and other activities; By participating in social practice activities, students can understand the society and enhance their sense of mission of loving and building their hometown. Patriotism education for young college students continues to extend from inside school education to outside school, consciously establish the patriotic feeling that "the needs of the motherland are the highest needs", cut down simultaneously with the motherland, share the destiny with the people, closely connect personal goals with the destiny of the country and the nation, take root at the grass-roots level, serve the society, and reach the places where the party and the country need most Where the people most need to make achievements, we should shoulder the responsibility of patriotism with hard work.

### **3.2 Let young college students confidently establish patriotism in the same boat**

To educate young college students to establish patriotism, we should transform from extension and form to connotation and effect, so as to improve students' sense of acquisition and the effectiveness of education. We should not focus on the surface, but strive to continuously improve the effectiveness of education and form a multi-dimensional education network.

To educate young college students to establish patriotism, we should enhance the explanatory power, sustainability and radiation of patriotism education. Integrate the "salt" of patriotism education with the "soup" of epidemic prevention and control to enhance the sense of acquisition of College Students' patriotism education. Through certain carriers and ways, the purpose of education can really guide and help students' value judgment, solve ideological confusion and integrate theory with practice, so as to realize the "brain and heart" of patriotism education, Strive to turn students' patriotism into a trip to serve the country

To educate young college students to establish patriotism, we must pay attention to the law of people's growth and the law of Ideological and political education, and avoid immediately cultivating some "attitude expressing parties". To carry out patriotism education for young college students, we should earnestly enhance the sense of acquisition of patriotism education for college students, truly attack the ideological confusion and pain points of college students, accurately implement strategies, target explanations, analyze specific problems, and adhere to one key to open one lock. On the basis of fully respecting, understanding, trusting and motivating students, Make students follow the guidance of Ideological and political educators step by step, truly understand reason, seek truth, inspire students to think deeply, truly improve the pertinence of patriotism education and enhance the effectiveness of patriotism education for college students.

### **3.3 Let young college students shoulder the responsibility of patriotism imperceptibly**

The cultivation of patriotism responsibility is by no means a day's work. We should further guide students to internalize patriotism in their hearts and externalize patriotism in their deeds. Under the situation of epidemic prevention and control, improve the pertinence and effectiveness of patriotism education for young college students, so as to cultivate the hearts of all staff. Adhere to the combination of mental and moral education, give full play to the main role of professional teachers, counselors and ideological and political teachers, highlight the effect of practical education, understand the national and social conditions in practice, and combine the education of patriotism theory with the social classroom. We should constantly enrich the content of practical education, innovate the carrier of practical education, and promote the transformation of patriotism into conscious action to strengthen the country and serve the country.

Pay attention to cultural bacon. Cultural self-confidence is the source of national self-confidence and pride. We should constantly guide students to absorb and cultivate the nutrients of patriotism from culture. Take advantage of major anniversaries and important festivals to organize young college students to carry out activities such as raising the flag, taking an oath and paying homage to the monument, enhance the sense of ceremony of patriotic education, integrate the excellent traditional culture, revolutionary culture and advanced socialist culture of the Chinese nation into the daily education and publicity of campus culture, start from the side, start from the bit by bit and start from the details, Transforming the "reservoir" of culture into the "living water" of Ideological and political education will vigorously carry forward the combination of Chinese excellent traditional culture and campus culture construction, root in the national spirit and let students have a sense of identity.

## **4. Conclusion**

Patriotism education is the cornerstone of guiding young students to listen to and follow the party in the new era; It is the pillar of maintaining social stability and national unity in the new era; It is the golden key for young students in the new era to establish lofty ideals. In the special period of the whole people's fight against the epidemic, we should vigorously carry forward the spirit of

patriotism, implement effective patriotism education, and help contemporary young college students strengthen their political concept of patriotism and love for the party, enhance the cohesion of national unity, and improve their sense of mission for the country. At present, the epidemic prevention and control has become normalized. Only by strengthening patriotic education, telling the story of China's anti epidemic, and uniting the confidence and determination of young college students and the people of the whole country, can young college students take the great rejuvenation of the Chinese nation as their own responsibility.
