Keywords: Establish virtue and cultivate people; Ideological education; Party building leads

Abstract: The quality of students is not only directly related to the construction of socialism with politic education, but also related to whether the country can quickly achieve the grand goal of socialist construction, and the ideology and politic education of university student is an important way to cultivate university student to become qualified successors. Contemporary political thought educators in colleges and universities should aim at the situation, innovate their working ideas, strengthen the construction of students' grass-roots party organizations through various measures, and then do a good job in ideology and politic education for university student. Lide Shuren is the foundation of education. This paper clarifies the connotation of Lide Shuren, and analyzes the significance and function of Lide Shuren in the ideology and politic education and teaching of university student from multiple perspectives. This paper discusses the working mechanism of university student' ideology and politic education from the perspective of morality and cultivating people from three aspects: standardizing the evaluation of school-running quality in colleges and universities, establishing the teacher's work system, and constructing the student education management service system. Therefore, colleges and universities should be guided by the fundamental task of building morality and cultivating people, and deeply explore the effective practice path of ideology and politic education, in order to achieve the sustainable politic education of ideology and politic education in colleges and universities. This paper expounds that colleges and universities should focus on the fundamental task of Building Morality and cultivating people, and explore new measures and methods to do a good job in university student' ideology education, in order to continuously enhance the effectiveness of College Students' ideology education.

1. Introduction

In the new period of the politic education of socialism with politic education, it is very important and necessary to further promote the Construction of grassroots party organizations in colleges and universities, and to speed up the ideology and politic education of contemporary university student centered on Marxism-Leninism, Ideology and Socialist Theory System and Political Education [1]. For this reason, in the new stage of socialist construction, especially since the Fourth Plenary Session of the 13th CPC Central Committee, our party has taken strengthening the ideology and politic education of university student as an important compulsory course for cultivating university student [2]. The "Opinions of the Central Committee of the Communist Party of China and the State Council on Further Strengthening and Improving the Ideological and Political Education of College Students" issued by the State Council in 2004 pointed out that "strengthening and improving the ideology and politic education of university student is a major and urgent task." To cultivate people is the fundamental task of education, and to cultivate socialist builders and successors with all-round politic education of morality, intelligence, physique and beauty [3]." Emphasis is placed on the prominent position of "virtue" in the ideology and politic education of university student, and the importance of "virtue" in the ideology and politic education of university student. The importance of talent growth [4].

The ideology education of students undertakes the educational mission of protecting the ideology safety of university student and establishing correct values of university student. In the current ideology education environment, only by giving full play to the positive leading role of socialist core values and innovating education and teaching strategies can we improve the ideology realm

and comprehensive quality of College Students, and then achieve the talent training goal of College Students' ideology education in the new era [5]. The rational application of Lide Shuren in the daily ideology and politic education in colleges and universities can not only better standardize university student' words and deeds and cultivate their excellent moral qualities, but also help to enhance university student' personal comprehensive quality and promote their healthy and all-round politic education. Guide university student to form excellent moral qualities, lofty ideology and moral character, firm ideals and beliefs and noble patriotic sentiments, transform the requirements of core values into daily codes of conduct, and strive to become firm believers, active communicators and loyal practitioners of socialism [6]. Based on this, this research discusses the ideology and politic education of university student, and aims to organically combine the ideology and politic education of university student with the concept of "cultivating people with morality", that is, to develop the ideology and politic education of university student in combination with the new educational concept of the times, so that the ideology and politic education of university student will become more healthy politic education.

2. The Significance of Lide Shuren to Ideological and Political Education of College Students

2.1. Inherit and expand the traditional moral education concept

China has an ancient civilization of 5000 years. After thousands of years of cultural accumulation, it has formed a broad and profound cultural tradition [7]. Through understanding our cultural traditions, we can find that ideology and moral education plays a very important role in our history and culture, which is specifically reflected in the following aspects [8]. Party building in colleges and universities in China is the core of university student' ideology and political guidance, and it is also the guiding light to enhance university student' political consciousness and sense of national responsibility. It has far-reaching influence on contemporary university student to form correct ideology consciousness, establish firm ideals and beliefs, and cultivate good moral quality, and it is also the premise guarantee of talent cultivation. Party building Political education in colleges and universities should focus on the fundamental task of training qualified builders and reliable successors for the socialist cause, and provide strong ideological, political and organizational guarantees for building a socialist university that cultivates high-quality university student [9]. Under the interaction of various factors, it is particularly important to do a good job in the ideology and politic education of university student. This shows the important position of moral education in social governance from "governance with virtue", "virtue is only good governance, and governance is in nourishing the people". Finally, there is the aspect of moral education method [10].

Ancient Chinese educators created a variety of practical moral education methods, such as personal education, practice and inspiration. Colleges and universities advantages of the party, strengthen and promote the ideology and politic education of university student through the full interaction between the party building work and the ideology and political work of university student, and cultivate and bring up high-quality talents to meet the needs of the times. In the 18th my country, it was clearly put forward that the idea of moral cultivation should be regarded as the basic idea of education in our country, and students should be trained into high-quality talents with comprehensive politic education of comprehensive quality. The core in universities is to cultivate people by virtue. Although Lide Shuren is an inheritance of my country's cultural traditions, in this process, it is necessary to identify and selectively inherit, and combine with practical needs to promote its politic education.

2.2. The significance of the era of Lide Shuren

With the continuous politic education of China's education, it can be clearly found and has been approved by most educators. In the historical period, establishing virtue and cultivating people has extremely valuable significance of the times. It politic education and construction. Under this kind of teaching idea, we often pay more attention to the cultivation of students' professional knowledge, but ignore the ideology and politic education of students. Under the background of the continuous

politic education of society, students' horizons have become wider and wider, and the impact of various erroneous ideas has become stronger and stronger. Many students have problems such as vague political beliefs, low ideology and moral level, and the influence of erroneous values, which puts forward new requirements for the traditional ideology and politic education in universities. The thought of socialism with politic education is an ideology concept that conforms to the actual situation of my country's politic education and is more superior than other thoughts. The party's ideology line is that everything starts from reality, integrates theory with practice, seeks truth from facts, and tests and develops truth in practice. To be realistic, emancipating the mind is a necessary condition. The emancipation of the mind or not is of great importance to the party building .

Ideology education runs through the whole process of College Students' study and life, and the process of ideology education is inseparable from the whole process guidance of Party building. Therefore, the ideology and politic education of university student is inseparable from various forms of Party building, such as various ideology and political learning, ideology reporting, organizational activities, social practice, volunteer service Field research activities, which are not only the way to carry out the party building work, but also the effective form of the implementation of ideology education, can promote the realization of the goal of ideology education for university student. As far as the majority of students are concerned, infiltrating the thought of cultivating people with virtue into all aspects in daily study and life can greatly promote the positive politic education of students' values, world outlook and outlook on life, and help to standardize students' words and deeds and correct their wrong ideas.

3. The effective path of ideology and politic education for university student from the perspective of Lide Shuren

3.1. Improve ideals and beliefs and speed up the construction of teachers' Morality

Ideals and beliefs are the indispensable spiritual motivation for firming up personal Contemporary political thoughts. Ideals and beliefs can constantly spur people to make continuous efforts, bravely move forward, and persevere in the realization of their own dreams and goals. take the responsibility of political leadership, effectively grasp the dominance of university student' ideology work through party building, strive to open up a new situation of party building students' ideology leadership, research and discuss Marxist theory and promote grass-roots party building Share and build with the theory of ideology and politic education. Before, the construction and management of party organizations were mainly carried out by using the traditional management mode. In the overall pattern of modern grass-roots party building, it was mainly carried out through network. Network party building should be combined with specific conditions to promote the party organizations to achieve all-round coverage. As educators, we should firmly seize the historical opportunity, take the construction of Contemporary political thought theory course as a breakthrough, highlight the ideology characteristics of Contemporary political thought theory course, highlight its "preaching" and "moralization" functions, firmly adhere to the fundamental task of Building Morality and cultivating people, take the cultivation of Teachers' morality as the guide, and take the cultivation of College Students' morality as the teaching focus, and solidly promote the ideology and politic education of university student. This paper mainly investigates the students' understanding of the popularization of Marxism, some of which focus on the ideology and political theory courses in colleges and universities. The author analyzed and sorted out the data of 388 valid questionnaires, and analyzed the basic information of the questionnaires. As shown in Figure 1.

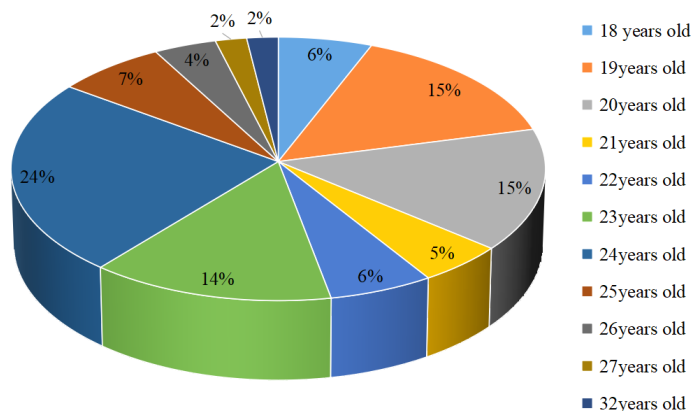

Figure 1 The age distribution of the students surveyed

①The number of boys accounted for 19% of the total sample, and the number of girls accounted for 81% of the total sample. ②Because some graduate students are involved in the survey, the age span of the students is large, ranging from 19 to 32 years old. ③ There are more than 20 design disciplines in this survey. From the survey distribution, the sample number of these disciplines accounts for 2%--13% of the total sample number. ④ The members of the Communist Youth League accounted for 57% of the total sample, the CPC members and non party activists accounted for 38% of the total, and the masses and others accounted for only 5% of the total. As shown in Figure 2.

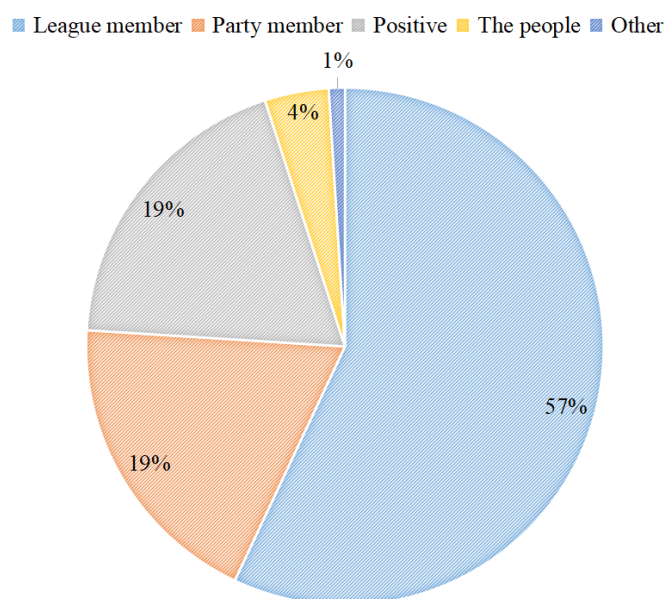

Figure 2 Distribution of political outlook of surveyed College Students

⑤ The number of student cadres accounts for 42% of the total sample, while the number of non-student cadres accounts for 58% of the total sample. ⑥ The number of students living in the city accounts for 53% of the total number of samples, the number of students from counties accounts for 21% of the total number of samples, and the number of students from villages and towns accounts for 26% of the total number of samples. ⑦ The number of samples with an average annual family income of 10,000-50,000 yuan is the largest, accounting for 37% of the total number of samples. The number of samples with an average annual family income of less than 10,000 yuan ranks second with 28%, and the average annual family income is 60,000-100,000 yuan. 26% of the samples were collected, and only 9% of the samples had an average annual household income of more than 100,000 yuan.

3.2. Innovating educational contents and enhancing the effect of Building Morality and cultivating people

Schools should always take university student as the main body of education, consciously implement the idea of educating people by virtue, rationally follow the objective requirements of social construction in the new period, and Combined with the actual situation contemporary university student' values and moral qualities, adjust and clarify the educational objectives, change the idea of educating people, innovate the teaching content, optimize the teaching methods and methods, carefully set the curriculum, and constantly explore the working mode of ideology and politic education from the perspective of virtue. Colleges and universities should strictly follow the principle of people-oriented education, timely change educational ideas, comprehensively integrate high-quality educational resources, expand educational content, innovate educational forms, improve the moral education mechanism, and effectively infiltrate moral education into ideology and political theory courses. Changes in teaching methods of ideology and politic education. On the premise of fully ensuring the teaching of basic theory courses, colleges and universities should widely carry out rich and colorful practical activities such as ideology and moral reporting meetings for contemporary student groups, volunteer services for university student and publicity meetings for outstanding deeds of moral models, so as to better promote the comprehensive integration of educational resources, the innovation and expansion of educational content, the optimization and transformation of educational forms, and deepen the construction of theory and practice classes, We will truly realize the coordinated politic education of theoretical education in schools and practical activities outside schools, and ensure that ideology and politic education in Colleges and universities achieves the desired results.

Colleges and universities should strengthen the construction of software and hardware facilities for ideology and politic education, continuously expand educational forms, optimize educational methods, and formulate a sound practice system and system for ideology and politic education. From the perspective of cultivating people by virtue, colleges and universities should continue to enrich the teaching content of ideology and politic education, change the teaching form, improve the quality of the educational environment, broaden the channels for knowledge dissemination, set up scientific and reasonable course content, and increase the construction of ideology and politic education platforms. efforts to build a sound ideology and politic education and teaching mechanism. In addition, colleges and universities can also use the school's official website, university student' forum, wechat official account, microblog and other media to infiltrate high-quality ideology and politic education resources into daily teaching, realize the cooperation and sharing between online education and resources, consciously build a perfect online ideology and politic education platform, actively broaden the channels of ideology education, and fundamentally strengthen ideology and political construction, so as to create a good learning environment .

4. Conclusions

College students, like the rising sun, have unlimited vitality and potential, bear the Important Responsibilities for Development harmonious politic education of society and positively guiding social morality, and are the hope of the nation's rise and the bridge for the country to stand proudly in the world. Through the interaction between the construction of grass-roots student party organizations and the ideology and political work of university student, the role of the party's grass-roots organizations and the role of young university student will form a synergy, so that college student party organizations and student party members can contribute to party building. Through the research on the significance of the fundamental task of cultivating morality and cultivating people, we know that strengthening ideology and politic education, improving the quality of teachers, optimizing the allocation of educational resources, and innovating extracurricular practice paths are the realization paths of the fundamental task of cultivating morality and cultivating people, which can basically build the education model of cultivating morality and cultivating people. We should integrate moral education into the daily ideology and political teaching, correctly guide the politic

education of ideology and politic education, speed up the construction of teachers' morality, enhance the effect of moral education, expand the channels of moral education, maximize , and fundamentally improve its educational quality.
