Keywords: college archives; ideological and political education; all-round education.

Abstract: University archives contain rich ideological and political education resources and have the unique advantage of exerting the function of ideological and political education. The management of college archives must adhere to the task of the Center of Talent Cultivation and Moral Education, actively explore the new path of “Internet + Ideological Education + Archives”, promote the deep integration of college archives management and ideological and political work, and work together to create a new situation higher education career in China.

1. Introduction

There is a natural connection between college archives and college students' ideological and political education. Giving full play to the ideological and political education function of archives resources is a new requirement for archives work in the ideological and political education of socialist colleges with Chinese characteristics in the new era. Only do a good job in college archives research and research, information management and service work, deepen the ideological and political education elements and important educational values contained in college archives, broaden the ideological and political education carrier and work path, and give full play to the ideological and political education function of college archives resources In order to promote the high-quality connotative development of college archives management and effectively promote the ideological and political education of contemporary college students to achieve practical results.

2. New Requirements for Archives Work in new era

The ideological and political work in colleges and universities is related to the fundamental problem of what kind of people to train in colleges and universities, how to train people, and who to train people. When socialism with Chinese characteristics enters a new era, colleges and universities must realize the comprehensive coordination and unification of education, management and service in the process of ideological and political education, and carry out ideological and political work throughout the whole process of education and teaching, so as to realize the whole process of educating people and cultivating people in all directions.

Archives is the true original record of human society's practical activities, and it has the important value of “preserving, ruling, retaining history, and educating people”. University archives are the historical records of different forms and carriers of various texts, charts, sound images, etc., which are directly formed by colleges and universities for enrollment, teaching, scientific research, management, etc., and contain rich educational resources. It has the unique advantage of exerting the function of ideological and political education. How to carry out archival work in college archives departments and implement the fundamental tasks of Lide Shuren is the key to improving their own quality and promoting connotative development.

3. The functional advantages of ideological and political education in college archives resources

University archives have original record, knowledge attribute, cultural attribute and information attribute. These attributes determine that it can become the carrier of ideological and political education, can play the role of promoting ideological and political education, and have the unique advantage of exerting the function of ideological and political education.

3.1 Rich ideological and political education resources.

The archives of colleges and universities have witnessed the course of school construction and development. They record the achievements of teaching and educating people and scientific research. They carry the university spirit, fine traditions and advanced culture composed of study style, teaching style and school spirit. This spiritual wealth is the thought of college students. A valuable resource for political education. Historical evolution, leadership speeches, major events, institutional changes, subject professional situations, etc. in the party group and administrative archives, honor certificates, trophies, scholar handwritings, etc. in the physical archives, recording the struggles of colleges and universities, including colleges and universities Glorious history. Generally speaking, the history of running a university, especially a century-old old school with a long history, shows from the side that our country and nation have achieved national independence, national liberation, democracy and freedom, and gradually struggled for the great rejuvenation of the nation. National fine revolutionary traditions and core values. It can be said that the use of these archives to compile history and organize exhibitions is to educate college students on patriotism, collectivism, socialism education and core values. The teaching and research archives record the theoretical and practical achievements of the faculty and staff in the field of teaching and educating people and scientific research, reflecting the scholars' rigorous academic study, hard work, forge ahead, and pioneering and innovative spirit; The collection, organization, and custody of outstanding achievements, significant contributions, influential and well-known scholars, alumni's life experiences, essays, monographs, manuscripts, certificates, letters of appointment, media reports on advanced deeds, etc. The struggle process reflects the moral sentiments of self-improvement, hard work, dedication, and contribution to society. Undoubtedly, these archival materials are an excellent resource for patriotic education, ideals and beliefs, growth and education, and ethical education for college students.

3.2 The original and convincing recordability of archives

The content of ideological and political education for college students is a summary of our party's experience in the long-term revolution and construction practice, and is the spiritual driving force for enhancing national cohesion and realizing the great rejuvenation of the nation. In the process of ideological and political education, only the link between history and traceability, and the use of factual speech in connection with social reality can make contemporary college students internalize and externalize. The essential attribute of the archive called "first-hand information" is the original recordability. It not only records the true original appearance of history, but also the carrier of history is the original handwriting, image, voice, etc. that best explain the historical reality. It can be said that The archive is the memory of history and the most authentic and authoritative fact. University archives is an objective original and true record of the construction and development of a university. It carries the wind and rain of college construction and development. As a college student studying and living in a university, it is familiar with and familiar with the alma mater, especially The influential teachers and students of the school and the major events that record the development of the school make the students feel authentic and make the content of the education more convincing.

3.3 The abundant nourishment from cultural products such as the compilation and research results of college archives, and the enhanced affinity, pertinence, attraction and appeal of ideological and political education.

Through the screening, processing, refining and compilation of archives, cultural products that

spread culture and educate the public, including archives exhibitions, editing and reading materials, and audio and video products, are formed. The archival cultural products with text, pictures, physical objects, video and audio as the carrier are characterized by intuition, vividness and image. Compared with pure persuasion education and theoretical teaching, they are more targeted and attractive to college students, which makes college students interested. To understand and understand the people and things in the archives and cultural products that are close to the realities of learning and life, and to be close to them. In the process of visiting, reading and appreciating, they are subtly infected by intuitive, vivid, vivid and real people and things. And edifying, so as to achieve a quiet and educational role.

4. Strategies to use and give play to the ideological and political education function of college archives resources

At present, the ideological and political education function of college archives resources mainly focuses on patriotic love school education, ideal and belief education, growth and talent education, and innovation and entrepreneurship education. The staff of the archives department of the university and the ideological and political education workers should unify their thinking and understanding, actively explore ways and paths of deep integration of archives work and ideological and political education, and commit themselves to effectively enhance the effectiveness of ideological and political education in colleges and universities.

4.1 Using the archives resources of colleges and universities for patriotism education

Focusing on patriotism education is the main task of strengthening and improving the ideological and political education of college students. The archives of colleges and universities record the development of school development through literature, photographs, objects, images and other forms. From the initial difficulties in the early days of the founding to the flourishing and growing, the older generation of educators and intellectuals in order to revitalize and develop the national education cause. Actively participating in the first-line arduous struggle and selfless dedication, is the most direct material and model to stimulate students' sense of national identity, patriotism, love of school, and enhance their sense of historical responsibility, mission and honor.

4.2 Using the college archives resources to carry out the education of ideals and beliefs to guide the direction of life and strive to achieve brilliant performance

As a place where intellectuals and high-level talents gather, colleges and universities in the long-term process of running schools, generations of academic elites for the sake of China's educational undertakings and scientific and technological rejuvenation, for the great rejuvenation of the Chinese nation, do not admire the merits and demerits, and some give up the superiority of foreign countries. Work and living conditions resolutely returned to China, overcoming many difficulties, based on the three-footed platform, adhered to the front line of scientific research, explored and accumulated a series of successful experiences in education and teaching reform, and created a large number of academic and scientific achievements that meet the needs of personnel training and economic and social development. Correspondingly, the archives materials of colleges and universities simultaneously, vividly and vividly recorded the footsteps and unremitting pursuits of the education, teaching and research personnel based on their own duties, innovation, and practical actions to serve the motherland and the people. Therefore, through the rich and dignified historical materials of the revolutionary struggle and the true experiences of alumni, education guides students to correctly understand the world and China's development trend, and understands and grasps the history of human social development from the historical development and great practice of our party's exploration of socialism with Chinese characteristics. Inevitably, understanding and grasping the historical inevitability of socialism with Chinese characteristics, enabling students to establish the common ideals and firm beliefs of taking the road of socialism with Chinese characteristics under the leadership of the Communist Party of China and realizing the great rejuvenation of the Chinese nation,

thus motivating students to consciously integrate their personal ideals In the cause of the country and the nation, we are brave in the forefront and pioneers of the times.

4.3 Using college archives resources to develop and grow talents, so that students can establish a correct world outlook, outlook on life and values

The archives of colleges and universities truly reproduce the excellent traditions of how the alumni of the past generations set their minds to start a business, and to teach their families to form a correct “three outlooks”; systematically and comprehensively preserve the university culture, university spirit, and school songs of each period of the school. School mottos, etc., lead students to inherit the excellent school spirit; objectively record how many teachers and students rigorously drop out of school, repeatedly solve problems, and achieve breakthroughs, subtly promote good academic style; establish integrity files, psychological files, and strengthen compliance and self-awareness Self-disciplined education, helping students to build good moral conduct; guiding the majority of young teachers and students to study for the rise of China, serving the society, serving the motherland and the people, and working tirelessly to realize the Chinese dream of the great rejuvenation of the Chinese nation. Gradually establish a correct world outlook, outlook on life and values.

4.4 Using college archives resources to cultivate the sense of responsibility of contemporary college students and promote the construction of spiritual civilization

The university archives record a large number of activities for the students of the school to glory for the school. Through the publication of literature and various scientific research results, it reflects their sense of collective responsibility to a certain extent. In the current university archives and school exhibition halls, the school history and teaching management process and teaching objectives of the school have been continuously developed. Academicians and researchers have fully demonstrated their sense of responsibility in the historical process of building school culture. Therefore, this sense of collective responsibility can play a certain role in infecting students and promote the development of a sense of responsibility. In the process of building socialist spiritual civilization and cultivating ideological and political education, the cultivation of its sense of responsibility has added a lot of color.

4.5 Using the archives resources of colleges and universities to cultivate the spirit of the times of contemporary college students' reform and innovation.

In the socialist core values system, innovation is the focus of ideological and political education. Students should be actively guided to develop in social practice and dare to innovate. The archives of colleges and universities record the innovative spirit and experience of many teachers and scholars in teaching, research and management services, and the innovative achievements thus transformed. As a perfect example, it will bring important enlightenment to students and stimulate students to advocate science. The enthusiasm for innovation and lead it to the path of innovation.

In particular, in order to better play the ideological and political education function of college archives resources and enhance the influence of college archives, college archives management must follow the pace of the information age and accelerate the digitization, electronic and network construction of archives. Further use of traditional media such as school newspapers and school radio stations to open up archives-related columns, publish archives information, etc., and give full play to the unique advantages of new media such as networks and mobile phones without the limitations of time and space, and the spread of information. Influence, enabling students and teachers to access educational resources extracted from precious archives. For example, to hold an online archive exhibition, the archives can make a physical exhibition into a video, with explanations, and publish it on the campus webpage and the archives webpage, so that users can click and browse at any time; combine some precious documents, physical photos and text descriptions. The multimedia method is displayed on the webpage, which can be provided to the ideological and political theory teachers as the material for making the courseware; through the new media such as Weibo and WeChat, some archive information is released, so that more people can easily obtain the archive information to

spread The influence of archives makes archives resources play a greater role in the ideological and political education of teachers and students.

5. Conclusion

The adolescent stage is the “booting and booting stage” of life, and it needs to be carefully guided and cultivated. The Archives Management of Colleges and Universities Must Adhere to the Task of Lide Shuren Center, and uphold the principle of “Cultivating People with Culture and Educating People with Culture” and actively exploring the new path of “Internet + Ideological Education + Archives” Promote the deep integration of university archives management and ideological and political work, benign interaction, peer-to-peer, form synergy, strive to create a new situation in the development of China's higher education, and train qualified builders and reliable successors of socialism with Chinese characteristics.
