Keywords: Xi Jinping; Ideological and Political Work in Colleges and Universities; Important statements; the Logical Line

Abstract: The purpose of foster character and civic virtue, five items, and "three trainings" is the key content of General Secretary Xi Jinping's important discussion on the optimization of ideological and political work in colleges and universities in the new era, and the logical line is based on the needs of the times and the status of ideological and political work, only by making it clear can we truly and comprehensively implement the important exposition ideological guidance in all aspects of our work, and provide theoretical and value guidance for ideological and political work in colleges and universities. Therefore, we must proceed from the core, foundation and important guidance in the logical line, grasp the important application value of the socialist construction with Chinese characteristics and the development of the neutral morals in the development of new people in the era, and clarify the basic consolidation role of the five main items of theoretical guidance, direction guidance, value guidance, spirit consciousness and cultural self-confidence, and grasp the guiding role of education in the times of who and how to cultivate people, and for whom to educate, to build a system of Ideological and political work for college students to meet the needs of the times, and to train more outstanding talents with advanced thinking and excellent capabilities for national construction and national rejuvenation.

1. Introduction

Under the development background of the new era, the ideological and political work of colleges and universities in China has also undergone various adjustments and changes. The workplace, the norms of the era, and social development all place higher demands on related work. How to accurately grasp the development needs of the era, the needs of national construction and the improvement of socialism have become the core tasks of ideological and political work in colleges and universities. General Secretary Xi Jinping put forward a series of important expositions for colleges and universities on ideological and political work in response to changes in the times and improve the effectiveness of ideological construction on the basis of the characteristics of the current development. The content is rich and has unique characteristics of the times. , Advance with the times plays an important guiding role. An in-depth analysis of the important logical logic and comprehensive implementation of it should be the main content of ideological and political work in colleges and universities. The core purpose, main content and fundamental tasks must be clarified to ensure the accurate understanding of General Secretary Xi Jinping's guiding ideology and provide strong support for ideological and political work in colleges and universities.

2. Five main items are the basis of the logical line

In essence, the guidance of the important statements is actually the soul casting project of the ideological and political education in colleges and universities. All the main items provide more full theoretical support and value orientation for the work of education people. At the same time, they also constitute the core points of logical line that we have explored. If we want to ensure giving full play to the value of educating people, we must have a deep exploration for it.

2.1 Theoretical guidance

In the aspect of the theoretical guidance, Marxism should be assimilated into the ideological and political work in Colleges and universities. General secretary Xi Jinping regards it as the fundamental guiding theory of CCP's development and the construction of socialism with Chinese characteristics .He not only attaches importance to the learning of relevant classic writings, but also takes them as the compulsory course for the ability construction and advanced ideology of the Communist Party. Study thoroughly and understand Marx doctrine and implement it in real life practice, only can we enhance the leadership of the party effectively and guide more social forces to participate in social development and national construction, ensuring the correctness and advanced direction of the various works of the party. The ideological and political tasks in Colleges and universities should pay more attention to the practice of Sinicization of Marxism in combination with the educational guidance in the significant discussion, penetrating the thought of socialism with Chinese characteristics into the classroom education, social practice and life experience to promote the construction of the comprehensive ideological consciousness of youth college students and equip them with the ideological consciousness of bearing the responsibility of national rejuvenation [1].

2.2 Direction

In terms of direction, take ideological direction as the key education point. The new area is a period in which network are pervasive and thoughts are diversified. For college students whose ideological cognition is not yet immature, it's important to make sure they have right values. We should clearly recognize the importance of the critical juncture in the grouting period, combining ideal and faith education, to promote the cultivation of students' excellent thinking cognition. General Secretary Xi Jinping has made a lot of arguments about the ideological orientation of college students, for example, in the ideals and beliefs to emphasize the need for college students to carry out spiritual calcium supplements, and to clarify the theme of the rejuvenation of the Chinese dream in the context of the new era for college students in order to guide the students to keep the right direction of development in life and study. Besides, we should urge them to study the theory and make clear the theme of the Chinese dream revival under the background of the new era of college students, to construct a scientific and innovative era cognition in the theoretical study and moral construction, and to improve the initiative and in-depth analysis consciousness in the national development and construction.

2.3 value leadership

In terms of value guidance, we should fully implement socialist core values and penetrate every aspect of ideological and political work. Socialist core values should be regarded as the key credential of ideological and political work in colleges and universities. In important discourse which pay extraordinary attention to the work force of contemporary college students in ' ideological cognition, value cultivation and the construction of students' values. Moreover, it is a critical period for the cultivation of their values in the university stage, so we must take seriously to the integration of socialist core values in the ideological and political work of universities. In important discourse, general secretary Xi Jinping emphasizes the important of teachers in the cultivation of students' values. On the basis of self- development, teachers should establish a comprehensive image of educators who are firm believers, active communicators and model practitioners. And through the practice of excellent values, subtly infect students, and gradually achieve the education task of students loving their teachers and believing in their deeds. Moreover, it is essential for teachers to carry out the education of values and promote the young college students to truly understand and practice the virtues of "understand great virtue, uphold the public morals and strict personal morals." [2]

2.4 Mental consciousness

In terms of spiritual consciousness, the education of national spirit and the spirit of time should be its core points. Through the comprehensive education of building people's patriotism and the

reform and innovation consciousness under the background of The Times, students' spiritual consciousness can be gradually enhanced. Spiritual awareness is the key ideological driving force in the process of national development. Only by ensuring that young students in the new era actively follow the trends of national development, identify the needs of national development, and independently participate in national construction, can they truly undertake the mission of The Times of national development and national rejuvenation. In patriotism education, it is necessary to start with the basic idea of morality and cultivation of people, so as to let students see clearly the current international environment of China's political, economic, cultural and other development problems, so as to enhance students' understanding and cognition of the realistic value of patriotism, and help students build national confidence and develop national self-esteem. Reform and innovation education is the main component of the important discussion. General Secretary Xi Jinping is particularly concerned about the important driving force for the development of the innovation consciousness and the cause of career development. "The talent is the foundation of innovation". All the work guides all require that the ideological and political work in colleges and universities should enhance the construction of the innovation environment, and guide the students to see the important role played by innovation in the 42 years of reform and opening up. The consciousness of innovation is rooted in the deep sense of students' growth, which guides students to become the innovators of the times, and promotes the continuous strengthening of the consciousness of innovation in learning, life and growth.

2.5 Cultural Confidence

Cultural self-confidence is also the key content of education at all stages. Only with firm belief in our national culture and identification with the time can we promote the great development of our nation. As the "root" and "soul" of our nation, cultural self-confidence is also the spiritual "lifeblood" of the healthy growth and comprehensive development of young college students. So there's also a lot of advanced guidance on cultural confidence and the inheritance of outstanding traditional culture .As the lifeboat of national construction and inheritance of the nation. We must pay attention to cultural self-confidence and development method in the process of innovation, content innovation, with scientific attitude to inherit and carry forward the new concept into the culture process. Not only inheritance, but also innovation and transformation, to give play to outstanding cultural values, cultural people, improve cultural identity, cultural education, enhance cultural confidence. Therefore, it must be based on the college students' education, through ideological and political education courses and social practice, the excellent culture will be carried out in the moral cultivation, value guidance and theoretical guidance, to provide important support for the cultural construction [3].

3. The fundamental task of foster character and civic virtue is the core of logic line.

Foster character and civic virtue is an important component of the statements, as well as its fundamental task in the ideological and political work of colleges and universities. It can promote the construction and firmness of students' excellent ideas, provide positive guidance and support for other components, and provide key reference for the clarity and planning of the "three trainings".

3.1 Firm Guidance of Ideals and Beliefs

As the key factor of human spirit construction, the education of ideals and beliefs is very important for students' lifelong development. Therefore, it is necessary to start from the guidance of important discussion, integrate personal ideals and beliefs with the development of socialism with Chinese characteristics, integrate personal growth with national construction and national rejuvenation, to strengthen ideological and theoretical education and campus culture publicity, and promote the times through various educational activities new people's and implementation in "four self-confidence". "Four confidence" is the key concept of general secretary that Xi Jinping's important exposition. Always strengthening the confidence of China's socialist road, theoretical self-confidence, institutional self-confidence and cultural self-confidence are not only the key

guidance for the development of Chinese nation's vitality and creativity, but also the necessary support for the rise of the national spirit, so as to ensure that the young college students can implement the "four self-confidence" thoroughly, in order to bring up them. We need to foster people who are responsible and persistent in the times, and build a more effective and practical talent training model.

3.2 The firm guidance of patriotic education

Patriotic education is the key point in the educational concept of "moral education". It plays an important guiding role in the ideological and political work in colleges and universities. In practice, the impact of multiple thoughts in the society has an important influence on the ideological cognition of young students. Ideological and political education in colleges and universities must be patriotic education as one of the main tasks. Through the cultivation of patriotism, to ensure the correctness of students' thoughts and provide important ideological support for the construction of socialism with Chinese characteristics. General Secretary Xi Jinping point it out in an important argument that we will promote greater support for the party's leadership, uphold the socialist system, generation after generation of patriots who uphold the principal and cultivate talents. This not only makes clear the important role of patriotic education in the ideological and political work of colleges and universities, but also provides advanced guidance and direction guidance for specific work. We should start from the national history, national culture and social course to promote the implantation and sublimation of 's feelings of home and country, and trains to change their cognitive thinking from childhood to childhood so as to sharpen the ambition of a strong country and practice patriotism.

3.3 Firm guidance of moral cultivation

Moral cultivation is another key point in the ideological and political work in colleges and universities. Only by worshipping morality, cultivating one's morality and thinking firmly, and taking core values as necessary guidance, can contemporary college students realize public morality, grasp morality, consciously follow the requirements of excellent ideology and quality, and build a good social cognition. Young age of college students is an important participant in China's characteristic socialism construction, ensure that college students' good ideological and moral construction is more advantageous to promote the development of the national modernization so more colleges and universities should be discussed from important related instructions, will be the construction of students' moral cultivation based on learning, in all aspects of life, starts from the minor matter, starts from the side, to the cultivation of the druid section gradually realize the construction of the Chinese nation's sense of honor, the moral idea to the general secretary of thought in the education guidance value into full play. At the same time, the ideological and political work in colleges and universities also needs to be combined with the changes of the times. It is not only necessary to make the education of moral cultivation more routine, but also to start with the characteristics of college students and the times, to make the moral education more vivid, making it more suitable for the stage characteristics of young college students' psychological construction, to gather consensus, and through the ideological and theoretical foundation construction, and the practical participation in social practice activities, to achieve the unity of knowledge and practice in the construction of students' moral cultivation, to promote them to gradually develop good habits, and to become a comprehensive talent with both ability and morality.

4. The core purpose of "three cultivation" is the guidance of logic line

Definitely clear of the "three trainings" and the actual practice is important on the core purpose of the plan, as a whole, not only plan the main content and foster character and civic virtue as a whole of the fundamental task, but also carry out the ideological and political work in colleges and universities start, from the starting point of training what kind of people to how to train people, and then to training for whom, constitute the important guidance of starting closed.

4.1 Who should be trained

Clear education task is to ensure pertinence, the rationality of basic education, and starting from the time development needs a comprehensive consideration, party's education policy has on the issue with specific solutions, to cultivate socialism new people, training more able to provide a good idea and a new era, promote the national modernization construction , physique of art is to develop specific standards, firmly grasp the five points, to cultivate more agree with the national development and meet the standard, and have the comprehensive quality of age. From the point of cultivating connotation, the main idea is the concept and thought of Marxism Sinicization, combining it with times development background and national construction needs to enrich and expand necessarily, therefore, making a more complete training Program; From the point of talent structure, general secretary Xi Jinping exchanged the educational demand from “virtue、 intelligence、 energy and decent” to a new standard virtue, intelligence, physical conditions, mind status and community service, enriched the meanings of them to make the talent enhance comprehensive literacy. In addition, virtue refers to the construction of ideological quality, intelligence refers to the construction of knowledge and culture, physical conditions refers to the construction of physical and mental health, mind status refers to the construction of aesthetic quality and community service refers to the construction of comprehensive skills. Students through the construction of diverse practical ability to achieve the construction of students' comprehensive ability. To make students have comprehensive application capabilities and achieve a comprehensive understanding of ideology and morality, so that guaranteed to cultivate newcomers with the ability to act as a mission. From the purpose of the political level, the personnel training goal should be to the era of development of our country's specific task performance, the construction of Chinese characteristic socialism is a long and slow process, the present is in a critical period, we must ensure that have enough talent reserves and resources supply for state construction to ensure the smooth progress in socialist construction. So it will be so clearly to cultivate what kind of talent and become the party's education policy, as well the key point of ideological and political work in colleges and universities.

4.2 How to train people

How to train people is a comprehensive extension of who is cultivated. General Secretary Xi Jinping took foster character and civil virtue as the core point in many discussions, and requested that on this basis, promoting the comprehensive development of moral, intellectual, physical conditions, mind status and community service of young college students in universities, Taking this as a key guiding ideology in ideological and political work can better ensure the rationality and scientificity of college talent training. In the implementation of the core point of foster character and civil virtue education, to fully implement the party's education policy and implement the fundamental task of foster character and civil virtue has become a necessary standard in the ideological and political education of colleges and universities. To be integrated into ideological education, it must also be penetrated one by one in many links such as cultural learning and practical participation, and runs through all foundations, disciplines, occupations, and management systems to ensure that the students' five educations simultaneously "education standards implement. Strengthening ideals and convictions, planting patriotism, and strengthening moral character cultivation are three basic ideological and moral education that is the basic content of the fundamental task of establishing morality and the foundation of constructing students' excellent ideological concepts. In addition, universities need to expand The emphasis in areas such as knowledge and culture education and the construction of teachers is to provide students with a better quality teaching environment and to promote students' comprehensive quality.

In the construction of teaching body, the statement guidance of “talent training, the key lies in teachers” shows that teachers play an important role in elevating students' comprehensive quality. Both the subtle influence of ideological quality and the teaching guidance of scientific knowledge will have a great impact on students based on their basic construction. The soundness and improvement of the ideological and political work should attach great importance to the role of teachers in particular; the enthusiasm and creativity, the management system and education

supervision, and the self-cultivation and political quality of teachers are all closely related to the students' final education situation. It should be through as soon as possible to promote the position of teachers' pay and improve the quality of the teachers in colleges and universities, to integrate the concepts of moral cultivation into teaching in a more diversified way, to integrate the cultural knowledge into the students' knowledge system in a more innovative and advanced way, so as to consolidate the fulcrum of education and grasp the educational lever.

4.3 We train talents for whom?

For whom we train talents, which is the destination of the value of the important sections, only by making this clear ,can the talents training completed successfully ,so we can ensure the target is accurate and the process is reasonable about which person should be trained and how to train. General secretary Xi Jinping has made a detailed discussion on this issue with "Four Service" as the core, only by clarifying the service subjects of the socialist builders and successors can we ensure ideological and political education can keep its essence and roots.

First of all, serving the people. Serving the people wholeheartedly is the core idea of the party govens, it's also the important part in the party constitution. General Secretary Xi Jinping always emphasizes the fundamental position which is about serving the people of party govens and as it the vital part of the party educational policy. So the college ideological political work should as it the core of answering this question and persist the fundamental idea of serving the people and let it permeate into the educational work. Besides, the work should include enhancing the understanding, agreement and implementation. Through the propaganda, education and in-depth research in the work, as well as the practical practice of the position, style and behavior, we can achieve good ideological identity and practical practice.

Second, it serves the Chinese Communist Party in governing the country. The party is an advanced core that leads the building of socialism with Chinese characteristics, leads the people's prosperity, and leads the great rejuvenation of the Chinese nation. The party spirit has achieved deeper internal unity and unity of interests in the development of the country and the people's nature. Leadership is at the core, actively devoted to the development of the party's work, and actively participated in various tasks of socialist construction. In ideological and political work, colleges and universities should focus on strengthening the guidance of the importance of party leadership work, combining with the development process of each stage of our country, to increase students' recognition of the value of the party in safeguarding the interests of the people, promoting national development, and realizing the great era of national rejuvenation, combine it with the practice and development of the new era, and import the Marxist Thought and Theory of sinitization, to guide students to become strong supporters, active communicators, and practitioners of standards in the development of socialism in China, relying on the excellent ideology and innovative skills of young students in the new era to provide more powerful support for the realization of the Two Centenary Goals.

Third, serving the consolidation and development of the socialist system with Chinese characteristics. Socialism is the fundamental attribute of China's development. From political construction, economic development to cultural training, all need to rely on the system of socialism with Chinese characteristics, consolidate the path of socialist construction, and provide the necessary guarantee for socialist construction. Therefore, the ideological and political work in Colleges and universities needs to improve students' correct cognition of it, know the superiority of the operation of the system, make clear the important value of the practice of the socialist system in the process of the development of the times and the international changes and the broad prospect of its development, establish the self-confidence of the system, build the consciousness of the system and responsibility, and make students understand the necessity and enthusiasm of various work under the leadership of the party more comprehensively, Integrate personal dream into national dream and national dream, improve quality and autonomy, so as to provide more support for the development of socialism with Chinese characteristics in the future [5].

Fourth, serving reform and opening up and socialist modernization. "Facing modernization,

facing the world and facing the future" is an important guide for national construction in the context of the development of the new era, and it is also the main focus of all future tasks in China. It must be used as the key to the construction of excellent ideological quality and ability improvement of young students in colleges and universities guide. We must thoroughly implement the "four self-confidences" in ideological and political work, implement all aspects of students' ideological work, improve students' ideological cognition, avoid students' empty talk, and enable students to not only understand the "four self-confidences", but also implement them in life and learning. Practicing and truly establishing self-confidence in reform, opening up and modernization; at the same time, we must broaden students' horizons and enhance students' comprehensive knowledge of international changes and knowledge development, so that they can closely adapt to changes of the Times to promote self-ideological optimization. Ability is perfect, develop a positive and enterprising spirit, and provide a solid foundation for the "four services".

5. Conclusion

To sum up, when carrying out an important discussion on the logic of inquiry, it should be closely related to the educational work of the university and the development background of the times, comprehensively consider the key content and necessary methods of the ideological construction of high-quality talents in the new era, and firmly grasp the full consideration about theoretical value, historical value and practical value in important exposition. Only by clarifying the important guidance on the in-depth development of socialism with Chinese characteristics and the ideology and actions in the great rejuvenation of the Chinese nation can we ensure the comprehensiveness and depth of the process of clarifying important expositions. The construction and development of socialism with Chinese characteristics needs to strengthen development, reinforce personnel training, and improve the system continuously. The ideology and politics of should be taken as the focus of development, deep research, implementation, consolidation, and innovation, so that colleges and universities truly shoulder the responsibilities of education for the country and morality education. The work responsibilities are integrated into the training plan for young students in the new era, enrich their ideological spirit, consolidate their cultural identity, strengthen their national self-confidence, and train more outstanding newcomers for the social development and national construction.
